New York "Yankees" Win To-Day

Series Stands: St. Louis 2. New York 2.

Babe Ruth Smashed Out Three Home Runs To-Day

New York won the fourth game of the series to-day by a score of 10 to 5. Both teams were on a batting rampage, each tallying 14 hits. The "Babe's" three homers, scored in the first and second, and in the sixth with one ahead of him, and a disasterous fifth innings, turned the game in favor of the Yankees.

Following the "Cards" rally in the fourth inning, when they went into the lead, Reinhart went in to pitch for St. Louis.

The Terrible Fifth

Yankees—Reinhart walked Combs. By fast baserunning Combs scored on Koenig's double. Ruth was walked. Meusel was walked and the bases were saturated. Gehrig was walked and the bases overflowed, Koenig being forced home. Two runs in, none out and the bases still jammed, was the situation Norman Bell had to redeem, after Reinhart had been sent to the bench. Lazzeri sacrificed, scoring Ruth. One out. Meusel scored while O'Farrell was throwing out Dugan at first. Two gone. Severeid was purposely passed to first. Hoyt forced Severeid. Four runs, one hit, no errors.

To day's game at St. Louis—Score by innings.

New York	101	142	100	—10
St. Louis	100	300	001	— 5

Previous Games

First, New York, Saturday.
St. Louis 100 000 000—1
New York 100 001 00x—2

Second, New York, Sunday.
St. Louis 000 200 301—6
New York 020 000 000—2

Third, St. Louis, Tuesday.
New York 000 000 000—0
St. Louis 000 310 00x—4

The fifth game will be played at St. Louis to-morrow.

"The Little Red Schoolhouse" will be brought on rails to the children living in the remote areas along the Canadian Pacific in Northern Ontario between Sudbury and Chapleau. Fully equipped with desks and teachers' accommodations the railway cars will visit about six points a month. There are about 400 pupils in these areas of the North who suffer disadvantages from the lack of school accommodation. It is expected that eventually the entire areas will be served by travelling schools.

Immigration to Canada in the first six months of 1926 amounted to 70,253, compared with 43,241 in the same period a year ago, an increase of 62 per cent., according to a statement issued by the Department of Immigration and Colonization. In the period under review British immigration increased from 20,452 to 27,849; immigration from the United States increased from 8,036 to 10,037 and from other countries increased from 14,753 to 32,367. Immigration for the month of June amounted to 12,191, an increase of 50% over June a year ago.

Saint John. — Representatives of Boards of Trade from all over the Dominion will gather here about the end of September or the middle of October for the first annual meeting of the Canadian Board of Trade. All three days are to be devoted to committee work on the larger questions of importance to the country at this time, including cost of government, immigration, taxation problems, preservation of the identity of Canadian grain, industrial research, trade and commerce, domestic and export, and particular attention is to be given to some system of facilitating inter-provincial trade.

Police Court News

Police Magistrate Gerard S. Peck, held court in Oyen this morning, when two cases were heard and disposed of.

Charlie Olson, arrested by constable Dobbin, A.P.P., and charged with being intoxicated in a public place, was fined $20 and costs amounting to $26.

Glen Frost of Sedalia, charged with obtaining money under false pretenses and offering a worthless cheque in payment of same, was fined $10 and costs amounting to $37.77.

The fine and costs in each case were paid.

At Sedalia, Richard Peyton of Chinook, appeared before J. K. Spooner, J.P., charged with operating a motor vehicle on the public highway without having 1926 license plates attached. He was fined $5 and costs amounting to $11.25. The fine and costs were paid.

Constable W. B. Dobbin, of the A.P.P., Oyen, prosecuted all cases.

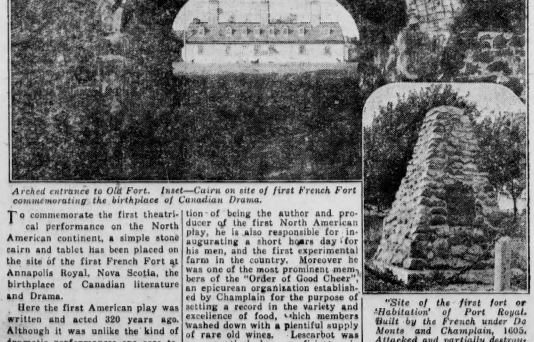
The First Theatre in North America



Arched entrance to Old Fort. Inset—Cairn on site of first French Fort commemorating the birthplace of Canadian Drama.

To commemorate the first theatrical performance on the North American continent, a simple stone cairn and tablet has been placed on the site of the first French Fort at Annapolis Royal, Nova Scotia, the birthplace of Canadian literature and Drama.

Here the first American play was written and acted 320 years ago. Although it was unlike the kind of dramatic performances one sees today from comfortable orchestra stalls, it was from all historical accounts, a "pretty good show." It was called "Neptune's Theatre" and was staged on the waters of Annapolis Basin, the actors performing on a movable and precarious stage of canoes, and the actors themselves, men of opposite extremes in social and intellectual condition, — some gentlemen of France, and others aboriginals of Nova Scotia wilds.

The author of this unique production was Marc Lescarbot, a French lawyer and poet, who came with Poutrincourt to Port Royal in 1606. During his first winter he was in charge of the Fort during the absence of Poutrincourt on an exploration expedition. If Lescarbot must be credited with the distinction of being the author and producer of the first North American play, he is also responsible for inaugurating a short hours day for his men, and the first experimental farm in the country. Moreover he was one of the most prominent members of the "Order of Good Cheer", an epicurean organization established by Champlain for the purpose of setting a record in the variety and excellence of food, which members washed down with a plentiful supply of rare old wines. Lescarbot was as particularly proficient in "throwing" a good party.

To add a still further "touch of gayety", as Lescarbot put it, to the return of Poutrincourt from his voyage of discovery, Lescarbot composed an original masque called "Neptune Theatre," which was enacted in the presence of Poutrincourt aboard ship. After it was over the merry company went ashore, entered the "habitation" and home of the "Order" and the banquet began. Later Lescarbot returned to France and wrote the "Histoire de Nouvelle France," and the Old Fort fell into the hands of the British.

It is the most peaceful spot in the world now. A beautiful bronze tablet, bearing the arms of France and Navarre at the top and the inscription:

"Site of the first fort or 'Habitation' of Port Royal. Built by the French under De Monts and Champlain, 1605. Attacked and partially destroyed by a British force from Virginia, 1613. Restored and occupied by Scottish Colonists, 1629. Laid waste on their retirement from the country, 1632. Home of the 'Order of Good Cheer'. Birthplace of Canadian Literature and Drama."

With a simple ceremony the tablet was unveiled recently by the Lieutenant Governor of Nova Scotia before members of the Historic Monuments and Sites Board of Canada, who were responsible for its erection, and prominent archivists from all over the Dominion. It is just one more interesting landmark at Annapolis Royal, surely the most romantic centre of Nova Scotia on the Dominion Atlantic Railway with its park and museum, and beloved of travellers.

RED ROSE TEA
"is good tea"
You've been intending to try Red Rose sometime. Why not now?

Growth Of Wheat Pool Movement

The farmers of Western Canada in less than three years, have established the largest co-operative organization of its kind in the world. The Canadian Wheat Pool, with its three units in the provinces of Manitoba, Saskatchewan and Alberta, now has a total membership of 125,000 farmers, who control 13,320,000 of the 21,000,000 acres sown to wheat last year in the three prairie provinces. It is handling the sale of the greater part of the wheat production of Canada, and Canada already exports more wheat than any country in the world.

The first of the three wheat pools commenced business in the province of Alberta in October, 1923, and at the close of the first pool year on July 15, 1924, had handled 34,500,000 bushels of wheat shipped by its members.

Meanwhile Manitoba and Saskatchewan were organizing pools. In the fall of 1924, they had perfected provincial organizations and the three provinces then merged their selling strength into one giant marketing organization, known as "The Canadian Co-operative Wheat Producers, Limited." This agency is incorporated under a Federal charter, with very wide powers. Its function is to take delivery of the wheat from each of the respective provincial pools and to place it on the markets of the world in such a manner as to secure a price commensurate with the natural law of supply and demand. Each of the three porvincial pools is responsible for gathering the wheat of its own members and placing it at the disposal of the central selling agency, which is controlled by a board of nine directors composed of the president, vice-president and one director of each provincial pool.

The largest proportion of the wheat is sold by the selling agency to importers and buyers in different countries of the world, for the agency has direct selling connections with every wheat importing country and its own representatives in 51 ports of the world. The funds which accrue from the sales are disbursed to the members of the three pools. This method of handling wheat provides a large volume through one agency and reduces the cost of operation to a minimum.

It is difficult, if not impossible, to estimate in dollars and cents the actual increase in the price of wheat attributable to the operations of the wheat pool, but the Pool, controlling as it does over 50 per cent of Canada's exportable surplus, has the opportunity of preventing large volumes of wheat being rushed on to the market and creating a glut which inevitably forces prices down. The strength of the Pool lies in its stabilizing power and in its facilities for selling in great quantities and in all countries.

This vast co-operative organization of farmers grew out of the experience of fixed prices for wheat established by the Canadian Government during the war, regulated by an official body known as the Wheat Board. Immediately after the war the farmers of Western Canada urged the Government to maintain the Wheat Board, but as it had been brought into being and had functioned under a War Measure Act, the machinery for its maintenance automatically passed out of existence with the signing of the Peace Treaty. The wheat producers of the Canadian West, learning that the Wheat Board could not continue, began to realize the necessity of an organization of their own to handle the marketing of their wheat in a way that would prevent a too wide fluctuation and secure a better stabilization of prices.

Through the Pool the wheat is handled at cost and therefore at a saving to the farmer. The Central Selling Agency with its direct connections is able to eliminate some of the handling charges between producers and consumer that are incidental under any other method of marketing. Moreover, the Pool relieves the farmer of the necessity of guessing the right time to sell his grain and assures him of the average price for the year on all wheat it sells. This orderly marketing avoids the disastrous effects of the flooding of the market in the fall which prevailed under the old system.

The Wheat Pool in Western Canada is a notable example of the advancement made by the farmers of this stage. Already it has shown the possibilities and advantages of co-operative marketing. Under the old system the farmer sold his wheat and took what the market offered. In the Pool system he delivers his grain when convenient and obtains the average price of the selling period, together with the saving in the handling costs. The Pool price to every member is the price at Fort William, less handling charges and freight charges. The latter, of course, vary, according to the length of the haul.

With the development of Canada's agricultural areas, only one-fifth of which are as yet under cultivation, the growth of the Canadian Wheat Pool may reach a magnitude never before conceived in co-operative marketing.

Farm Settlers From U.S.

Active movement of farm settlers from the United States to Canada continues, according to the department of immigration and colonization. Eighteen offices are maintained in the United States and all report increases for the month of August, with the agency at Fargo, N.D., heading the list with 272 farmers, who, with wives and children make a total population of 322. They brought with them to Canada cash and effects valued at $445,255.

Scheme Dit Not Work

A man entered the vestibule of a local hotel and placed his umbrella in the stand, but before going upstairs he tied to the umbrella a card on which he had written: "N.B.—This umbrella belongs to a champion boxer. Back in ten minutes."

In twenty minutes he returned, but the umbrella was gone. The card, however, was still there, and on it someone had written: "P.S.—Umbrella taken by a champion long distance runner. Won't be back at all."

Germany Now Thinks War Is Calamitous

International Strife is Insanity on a Wholesale Scale

It was the fashion, only a few years ago, to glorify war and to create in the minds of young men an impression of its necessity. Germany was particularly eager to give its youth a strong martial spirit and to hold before them military ideals. If Stresemann speaks for his countrymen—and there is no reason to doubt that he does—the Germans have had a complete change of heart. The appalling sacrifices of the war have taught them, as they have taught other nations, that war is not glorious, but always calamitous. International warfare is insanity on the wholesale scale. It is of course, natural and right that young men should go to the defnse of their country when it is threatened; it is noble to lay down one's life in a just patriotic cause. But if wars can be prevented as they can, if the proper state of mind is cultivated, it is the duty of every young person to help the movement along.

RHEUMATIC SUFFERERS .

May Obtain Relief by Enriching the Blood Through the Use of Dr. Williams' Pink Pills.

In the days of our grandfathers rheumatism was thought to be the unavoidable penalty of middle life and old age. Almost every elderly person had rheumatism, as well as many young people. It was thought that rheumatism was due to exposure to cold and dampness, and it was treated with liniments and hot applications which sometimes gave temporary relief but did not remove the trouble. In those days there were many rheumatic cripples. Now medical science understands that rheumatism is a disease of the blood and that with good red blood any man or woman of any age can defy rheumatism. There are now many elderly people who have never felt a twinge of rheumatism because they have kept their blood in good condition, and there are many who have conquered it by building up their weak, watery blood. The blood-enriching qualities of Dr. Williams' Pink Pills is becoming every year more widely known and the more general use of these pills has robbed rheumatism of its terrors. At the first sign of thin, impure blood protect yourself against the ravages of disease by taking Dr. Williams' Pink Pills. They have helped thousands—if you give them a fair trial they will not disappoint you. Their value in the case of rheumatism is proved by the statement of Mr. Finlay Beaton, Blackstone, N.S., who says:—"I took it on duty to tell you of the wonderful benefit I derived from the use of Dr. Williams' Pink Pills. I suffered untold agony from rheumatism and a run-down condition. The trouble got me incapable of work of any kind, and for a part of the time I was unable to move without the assistance of a cane. I took different medicine from doctors, and also other remedies that were recommended, but did not improve and had about given up hope of getting better when a friend advised me to try Dr. Williams' Pink Pills. I did this with the result that within four months I was as well a man as ever I had been. I can say that I was a complete week when I began using Dr. Williams' Pink Pills and that this medicine completely built me up in health. This was some years ago, and I have no return of the trouble since. I give this statement hoping it will benefit others."

You can get these pills from any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Aged Farmer Is Killed

Was Owner of 52 Quarter Sections in Saskatchewan

Death came instantaneously to Stanley Clark, wealthy aged farmer of the Rosedale district, when his automobile was struck by an engine. The late Mr. Clark was 70 years old, and was owner of 52 quarter-sections in Saskatchewan. The newspaper reports record the fact that the deceased had been a recluse since 1904, and "during all that time he had lived alone." It should also be written into the record, that the late Mr. Clark was a valued and respected member of the Wheat Pool, having delivered a contract on the 29th of August, 1923, his numbering 65-030.

Nineteen Trans-Atlantic Cables

The nineteenth trans-Atlantic cable is now operating, and the twentieth will doubtless be needed, notwithstanding the advance in wireless communication across the seas.—from the Boston Transcript.

Women in Ainu, Northern Japan, admire bearded faces so much that they tatoo their own to make them appear whiskered.

Keep Minard's Liniment in the house.

She—Why is your voice so sharp?
He— Because I have been trying to get a word in edgewise for a whole week.

More Canadian homes have automobiles than bathtubs. Well, where can you go in a bathtub?

W. N. U. 1649

Wins Scholarship

Jean Claude Lessard, who has been food controller at the Chateau Lake Louise for the past summer has been awarded a scholarship at Harvard University by the Province of Quebec Government. Mr. Lessard has had a particularly brilliant career at McGill University during the past two years. He will continue his study of railway economics at Harvard.

Mr. Lessard also held the position of food controller at the Canadian Pacific Hotel Algonquin in St. Andrews, N.B., for three years. He is not yet twenty-two years old.

Strange New Pygmies Found

Scientists say New Guinea Bush Men Were Friendly

In dense mountain jungles never before successfully penetrated by white men, the Dutch New Guinea expedition of American and Dutch scientists has discovered an entirely new group of pygmies. Details of the discovery have been received from the Associated Press correspondent accompanying the expedition. The dispatch was carried by a bush runner.

Entering a country in which previous expeditions had been decimated through fever and hardships, the scientists, after four months of travel, came upon the strange small people living quiet and secluded lives, hemmed in by rugged jungles, covered mountains and cut off from the rest of the Papuan tribes.

Matthew W. Stribling, of Berkeley, Calif., one of the leaders of the expedition, described the bush men as unusually friendly.

The pygmies, he said, talked in undertones or whispers and seemed afraid of being too obtrusive. They were not timid, but quite intelligent and always cool and collected.

"The first thing they did was to give us all a present. The presents consisted of their small bows and arrows, arm bracelets, bananas and betel nuts.

"They raise tobacco, sweet potatoes, bananas and pigs. They brought us a pig and all gathered around to make a ceremony of killing it."

A Wonderful Discovery

Swiss Scientists Find Group of Radio-Active Stars

Two Swiss scientists, Doctors Kolvorser and Deesalls, who have been living in a tent for the last month on the summit of Monch mountain, Geneva, at an altitude of 13,468 feet, making astronomical observations, have made a remarkable scientific discovery. They say they found that a certain group of stars send out extraordinary rays of light whose radio active force is far stronger than roentgen rays. The scientists hope to capture and employ these rays for a scientific medical purpose. The scientists, owing to the cold weather, were obliged to interrupt their investigations and have descended to Interlaken.

Farmers Have Received Patronage Refund

Saskatchewan Farmers Benefit by Pool Elevator Shipments

The distribution of $476,614 as a patronage refund to the farmers who utilized Pool Elevator facilities in Saskatchewan last crop year, will be welcome news. It represents 2 cents per bushel on all grades of wheat shipped through the 89 houses of Sask. Pool Elevators Ltd., last season, and 1 cent per bushel on coarse grains. 1½ cents per bushel will be refunded on platform wheat shipments to pool terminals; and ½ cent per bushel on coarse grains so shipped. Last year's handling charge on wheat being 4 cents, the refund will reduce same to a two cent rate.

The man who tells you that he has nothing to say is usually capable of saying a good deal if he were so inclined.

The smallest island owned by the United States is Samoa, with an area of 77 square miles.

For all pains—Minard's Liniment.

Claimed By Ireland

British National Anthem and "Yankee Doodle" old Irish Tunes.

"Yankee Doodle" is not American at all—it's Irish, according to Dr. Grattan Flood, an Irish authority on musical history. He asserts that "Yankee Doodle" was originally an Irish air known as "All the Way to Galway." "God Save the King," the British national anthem, Dr. Flood says, also is an old Irish tune which originated about 1595 and has been going strong ever since.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Gave Away A Fortune

Man Who Inherited a Million Dollars Disburses Amount in Four Years

It has taken Charles Garland, inheritor of a million dollar fortune, four years of earnest effort to give it away. But he has succeeded at last. His large corps of distributors, known as trustees of the American Fund for Public Service, Inc., have officially announced their triumph and the figures show that only a paltry $14,000 unGiven or unpledged, is left.

The news comes as a sad blow to many causes and movements that had hoped to get through their teething period on a part of the Garland trust fund.

The best known issue of "baby stamps" was begun Oct. 1, 1889, bearing the first baby portrait of King Alfonso XIII.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Steel phonograph needles that will play from 400 to 600 records without changing, are now made by a Missouri concern.

Storms On The Sun

Many Rapid Changes Taking Place says Chicago Professor

Violent storms are raging on the sun as well as on earth at present, says Professor E. B. Frost, director of Yerkes observatory of Chicago. Gigantic sunspots, visible to the naked eye through smoked glasses, give proof of the upheaval on the faraway planet he said.

Magnetic storms and northern lights may result form the distant storms, although no serious results will follow, the professor explained.

"The disturbance is in a solar latitude 23 degrees north, coming around the east side of the sun. Many photographs have been taken and very rapid changes are taking place," Professor Frost said.

Sunspots are not generally visible to the naked eye, he explained, unless grouped over vast areas.

Tourists Visit Yoho Valley

More than 20,000 persons saw the Yoho Valley, near Field, B.C., by auto this year, travelling over the Federal Government road which was opened early in the summer. This is regarded as one of the wonder spots of America.

Doctors Use It.
They recommend it also for sprains, bruises and other ills.
MINARD'S "KING OF PAIN" LINIMENT

Many Join Wheat Pool

A total of 81,642½ acres of non-pool grain in Saskatchewan was won for orderly marketing by the operators and superintendents of Sask. Pool Elevators, Ltd. from September 12th to 26th—approximately 10,000 acres every twenty-four hours.

Building Auto Highways

For the development of local industries, as well as for military purposes, the Home Department plans the construction of more than 2,000 miles of automobile roads in Hokkaido, Tokio, Kyoto, Osaka and other prefectures.

Genuine BAYER ASPIRIN

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism
DOES NOT AFFECT THE HEART
Safe
Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.
Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid. "A. S. A.").
While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

RUM RUNNING PACT BETWEEN BRITAIN AND U.S.

Washington.—The new rum smuggling agreement with Great Britain, negotiated at the time of Assistant Secretary Andrews' visit to London last summer, has been declared effective as from September 29.

The agreement was made operative through an exchange of notes between the Washington and London governments. While the text of the agreement is held in confidence, it is known that it provides administrative cooperation between British and United States authorities in the prevention of illicit liquor trade between British and United States territories.

Canada's Ambassador to U.S.

Matter Will be Subject of Discussion at Imperial Conference

Ottawa.—The relationship of Canada's proposed minister plenipotentiary at Washington to the British ambassador there will probably be the subject of discussion between Premier King and the British Government when Mr. King goes to London soon. As pointed out by Premier King some days ago, the appointment of Canada's representative at Washington will not be made until after a discussion in regard to the duties of the new office takes place. Hon. Vincent Massey, who will be the first Canadian minister plenipotentiary in the United States capital, is going to London and will be present when the matters affecting the position are discussed. Mr. Massey does not go to England as a member of the Canadian delegation to the imperial conference, but he is arranging to be in London when the discussion takes place.

Date Of By-Elections

Reported Contest: Will Be Held on November 22nd

Ottawa.—By-elections for the ministers of the new Government will likely have November 15 fixed for nominations and the 22nd for polling where the seats are contested. The writs cannot be issued until those of the recent election in the affected constituencies are returned, but they are all expected to be in by October 19. After that, a period of about 35 days will intervene before polling.

So far as present indications count, the ministers will not be opposed. The plan is to have all the elections on the same day.

Channel Swimmer Drowned

Boulogne.—The first tragedy due to ambition to swim the English Channel was recorded here when the body of a young Spaniard was washed ashore.

The body was identified as that of Luis Rodriguez Delara, who is said to have been a member of a prominent Madrid family.

Delara started secretly and without an escort in an attempt to swim the channel from France to England a few days ago.

Will Attend Conference

St. John's, Nfld.—Prime Minister Monroe, Newfoundland, accompanied by Hon. A. B. Morine, was a passenger on the Furness Liner Nova Scotia, which sailed for England to attend the Imperial conference. Hon. W. J. Higgins, Minister of Justice, has also left for England to represent Newfoundland in the Labrador boundary case before the Privy Council next month.

Missionaries in China

London.—A despatch to The Daily Express from Shanghai says, 500 missionaries are now isolated at Chengtu and are unable to escape from the city. The correspondent describes the situation at Chengtu as serious. The despatch adds Chengtu is the headquarters of numerous English and the United States missionary societies of all denominations.

Damage To Rural Phones

Regina, Sask.—The heavy snow and windstorm in the southeast of Saskatchewan a few days ago caused damage estimated at $20,000 to telephone lines and poles. For many miles in the southeast section every telephone pole was broken down and the wires snapped and broken, the summary of the damage showed.

35 States Sign

Geneva.—The secretariat of the League of Nations announced that 35 states have signed the reply which will be sent to Washington on acceptance of the United States reservations to the World Court.

W. N. U. 3649

Has Removed Civil Service From Politics

Successful Move in Manitoba Spreading to Federal Field

Winnipeg.—Efforts to remove the Civil Service from politics and to raise the standard of work have been successful in Manitoba, and now are meeting with success in the federal field, according to speakers at a session of the Citizens' Research Institute's convention here.

The reforms instituted, it was declared, are growing more and more popular with politicians, civil servants and the general public alike.

"The old idea of the old saying 'to the victor belongs the spoils,' is giving way to the more honorable conception of 'the best shall serve the state,'" declared a paper by William Foran, secretary of the Canadian Civil Service Commission.

J. W. Fleming, Civil Service Commissioner for Manitoba, explained the re-organization and economics in the province. Manitoba civil servants now numbered 1,507 members. Reorganization had cut down the number from over 1,500 and efficiency had increased. Promotion, he said, was made from within the service in almost every instance.

Speaking from long Parliamentary experience, W. F. Cockshutt, Brantford, Ont., said the patronage system had been nothing but a "vote loser," and not a "vote catcher."

Major Hume Cronyn declared the tragedy of the Civil Service was that of poor pay, which he hoped to see remedied.

Military Occupation Of Germany Is Hindrance

Described as Humiliating Now That Germany is Member of League

Berlin.—The German papers of every political shade view the Germersheim incident in which a French officer killed one German and wounded two others, as proof that the military occupation system constitutes the greatest hindrance to a French-German understanding. Like many, he feign troops are on German soil, they say, brawls and friction are likely to occur, and one effect might be to wreck the entire work of conciliation started by Messrs. Briand and Stresemann in their conversations at Geneva and Thoiry.

Continuation of the occupation is felt to be particularly humiliating now that Germany is a partner with her former enemies in the League of Nations. The press is especially emphatic in demanding that measures might be adopted corresponding to the spirit of the Locarno treaties.

Will Apply The Remedy

New Minister of Customs Says He Believes in Action

Kitchener, Ont.—"First find out as completely as possible what's wrong, and then apply the remedy," is what W. D. Euler, newly appointed minister of customs in the King Government, is going to do when he takes up his duties at Ottawa, he said yesterday. "That's all that could be expected from a man in my position just now," he added. "This is not the time to talk but to act."

Will Retire From Public Life

Winnipeg. — The Ottawa correspondent of the Manitoba Free Press says: "Information obtained in Ottawa today is to the effect that Rt. Hon. Arthur Meighen is not interested in proposals to accept the provincial leadership in British Columbia or elsewhere. He is determined to retire from public life and will not be deflected by offers of positions of lesser importance than the one he is resigning."

Will Consider Steamship Contract

Ottawa.—While no official statement is available at present, it is understood that the Government will consider the situation in regard to the Canada-West Indies steamship service very shortly. The contract for the service expired some time ago, and it has since been carried on on a temporary basis.

Bandits Attack Motorists

Mexico City.—Bandits again have have attacked motorists near Mexico City. The authorities say that no foreigners were involved. Two Mexican motorists were wounded by the bandits, who escaped. Troops are said to be pursuing the outlaws. They are under orders to exterminate the band.

Accidents at Rodeo

Toronto.—Ray Miller, Cheadle, Alta., sustained a broken leg when kicked by a horse; Coyote Frank of Great Falls, Mont., suffered concussion of the brain when thrown, and Jack Cooper of Jasper Park, Alta., had his forehead split open by a kick from one of the ponies at the rodeo here.

Has Faith In Canada

Lord Darling Has Unbounded Optimism Regarding Our Future

Toronto.—They can no more stop this Dominion from becoming a great power in the world than they can dam the Horse Shoe Falls," declares Lord Darling, noted British jurist, here in an address to the Ontario Bar Association, in which he expressed unbounded optimism in Canada's future. "Any one who has been in Canada as I have cannot help being convinced that it has a wonderful future. I only wish it had been borne in on everyone as it has been borne in on me. And Canada is not the only Dominion in the Empire. The Empire will develop. There can be no doubt about it.

Would Help Politicians

Combining the Human Voice With Moving Pictures

London.—Government leaders, having been successful in showing themselves to the people through the movies, may now combine with the movie feature the transmission of their voices to the public.

Following its recent widely displayed film showing cabinet members at work and at play, the Government has acquired a new invention which coordinates the human voice with the movies. Already Sir William Joynson-Hicks, Home Secretary, has appeared in the movies with a speech given by means of the new device.

TAKE STEPS TO STOP SMUGGLING ALONG BORDER

Ottawa.—Measures for the suppression of smuggling on the international border will be one of the chief considerations in the Canadian customs policy when it resumes shortly.

The order-in-council which enlarges the commission from one to three judges has been issued. It gives the commission the same powers which were possessed by the committee of the House of Commons which began the probe last February. It calls for the continuance and completion of the inquiry into smuggling in Canada and further charges the commissioners to find out whether the treaty of June 6, 1924 between Canada and the United States for the suppression of smuggling along the international border is being carried out according to the declared intent thereof and as to whether any amendment to the said treaty is necessary or desirable to ensure the suppression of smuggling."

The chairman of the commission is Sir Francis Lemieux, chief justice of the province of Quebec, who has already held a number of sittings. The additional judges are Chief Justice J. T. Brown, of the court of King's Bench, Saskatchewan, and of Judge William H. Wright, of the high court division, Ontario supreme court. It is probable that the new commissioners will meet Sir Francis Lemieux in the near future to draw up an itinerary of sittings to be held. Hon. N. W. Rowell will be counsel for the commission with R. L. Calder, K.C., who acted as counsel for the parliamentary committee which investigated the customs department during the last session.

The date of the resumption of the inquiry has not been announced but it is expected to get under way at an early date.

Addresses Research Conference

PROF. W. W. SWANSON

professor of political economy in the University of Saskatchewan, who delivered an address on "Tax Free Bonds" at the Citizens' Research Institute conference held in Winnipeg.

Miners Are Rescued

Forty-three Michigan Miners Brought to Surface After Five Days' Imprisonment

Ironwood, Mich.—Forty-three miners returned to their homes after a successful five days' battle to release them from their underground prison in the G. Pabst iron mine, where they were trapped last Friday.

Rescue of the miners from the depths of the mine was completed at 11.20 o'clock at night. At that hour every one of the imprisoned miners had been lifted to the surface through an adjoining shaft. Physicians decided a day's rest in complete seclusion and hospital comfort, was the best way to safeguard the health of the men. Upon this advice, all men were ordered to Grandview hospital.

The first man to come out of the mine shaft was greeted by the cheers of thousands, the ringing of bells and blowing of whistles.

Police protected the rescued miners as they were brought up or walked out of the shaft one by one.

They went immediately to the mine rescue car, where they were examined.

British Trade Unhindered

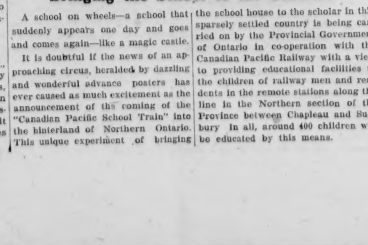
Military Intervention in China not Warranted Says Premier Baldwin

London.—Premier Baldwin told the House of Commons that British steamers are plying unhindered between Canton and Hong-Kong and that there has been no interference with British trade at Hankow despite recent agitation.

The Prime Minister said that reinforcements are now being sent to China to render the naval forces in the Far East sufficient to protect British subjects and interests. Military intervention is not warranted, Premier Baldwin said, and no army reinforcements have been dispatched.

Hermit Left $80,000

London.—Hayard Brown, the eccentric American millionaire, who lived as a hermit for thirty-five years in he yacht off Brightlingsea because of disappointment in a love affair in America, left property in England valued at $80,000, the publication of his will shows. Mr. Brown was 72 years old when he died last April. It is estimated he gave away $2,000,000 during his stay here.



Bringing the School to the Scholars

A school on wheels—a school that suddenly appears one day and goes and comes again—like a magic castle.

It is doubtful if the news of an approaching circus, heralded by dazzling and wonderful advance posters has ever caused as much excitement as the announcement of the coming of the "Canadian Pacific School Train" into the hinterland of Northern Ontario. This unique experiment of bringing the school house to the scholar in this sparsely settled country is being carried on by the Provincial Government of Ontario in cooperation with the Canadian Pacific Railway with a view to providing educational facilities to the children of railway men and residents in the remote stations along the line in the Northern section of the Province between Chapleau and Sudbury. In all, around 400 children will be educated by this means.

Military Scheme In Europe Against Russia

Baltic States, Britain and France Prepare, Say Bolsheviists

Leningrad, Russia.—Poland, according to reports received in Soviet marine circles, here, soon will receive from France fifteen warships, comprising an armored cruiser, two torpedo boats and twelve submarines.

The Polish government, it is also asserted, has received from Great Britain, means for extending and improving the Polish port of Gyrna.

This it is declared, is part of the intensive military and naval preparations by Britain, France and the Baltic countries against Russia. Latvia according to Russian naval authorities, will soon begin the construction of a huge marine base on the Courland coast, while the Finnish government is said to have assigned funds for the construction of dry docks which will accommodate vessels up to 10,000 tons in Finland.

Finland, also, the Bolshevists assert, is completing a modern naval base at Biorke, the nearest Finnish port to Russia, while in 1918 and 1919 was the base of the British fleet operating against Russia.

Building Plane For Trans-Atlantic Flight

Giant Machine is Now Under Construction in Italy

Paris.—The Caproni aeroplane works now are constructing an aeroplane of 2,000 horse-power for a trans-Atlantic flight, according to Clifford Harmon, wealthy sportsman and president of the International Aviation League.

Mr. Harmon, with the Italian ace, Col. Falchi, flew to Paris from Milan on a tour of the posts of the aviation league. Speaking at a luncheon the league gave for Col. Falchi, Mr. Harmon said that he would back the colonel to make a trans-Atlantic flight.

Mr. Harmon then told of having seen the giant Caproni being built.

"The Italian flyer who will pilot this 'plane has not been selected as yet," said Mr. Harmon. "But if Col. Falchi could I will back him to win and I will shoulder the expenses of this attempt personally."

It is rumored that Col. Falchi, as well as the noted long distance flyer Lombardo, Mendo, is being considered to make the flight.

May Practice In B.C.

Rumor That Hon. Arthur Meighen Will Move to Vancouver

Toronto.—A staff special dispatch from Ottawa to the Globe says:

"Right Hon. Arthur Meighen may become a resident of Vancouver, according to reliable information, and resume in the Pacific Coast city the practice of his profession. He has received important offers to join corporation both in Montreal and Toronto, but it is understood he is more disposed to go to the Coast. He has not yet reached a final decision on this matter.

"Sir George Perley is now the most likely person for temporary leader of the Conservatives during the coming session of Parliament."

VALEDICTORY OF BARON BYNG ON LEAVING CANADA

Quebec.—"I return to England imbued with the ideals of Canadianism. I have absorbed them during five happy years in Canada, and it is my purpose to do my very best to maintain them. The ideals of Canada have been beneficial to this country and they will continue to be so, but it is not only Canada that they will benefit, for they will exercise an influence for good to the whole league of English speaking nations."

This was the valedictory to Canada of Lord Byng of Vimy, the soldier and administrator who for the past five years has presided over the destinies of the Dominion. His Excellency's term as governor-general began on August 11, 1921, has ended, and on Sept. 20, he and his gracious consort, the Lady Byng sailed down the St. Lawrence River on board the Empress of France, with their faces turned towards England.

Prior to his departure, His Excellency received a representative of the Canadian Press in the library of Spencerwood the residence of Lieutenant-Governor N. Perodeau, of Quebec. It was not an interview so much as an informal chat, in which His Excellency gave expression again and again to his indefinible faith in the destiny of Canada and in the great part this country will play in the future, not only of the British Empire, but of the world.

PROPOSALS TO EXTEND EMPIRE SETTLEMENT PLAN

Ottawa.—New proposals by the British Government for an extension of the plan of empire settlement are, it is understood, being submitted to the Government by Lord Clarendon, administrator of the scheme.

Lord Clarendon has sailed for home, after making a personal inspection into the working of the scheme by which 3,000 British families have been assisted in locating in Canada. His report is that the migrants are doing splendidly in their new locations and that the scheme is working most successfully.

While no details are available until a definite proposition is submitted to the Government it is known that Lord Clarendon had repeated conferences within the last week with the new minister and officials of the immigration department preparatory to submitting plans for a further extension of the scheme. This would involve bringing in several thousand more families.

To Stimulate Trade

Canadian Industrial Leaders Plan "Canada Week" in Cuba

Montreal.—To stimulate trade between Cuba and Canada plans are now under way for a "Canada Week," to be observed soon in Cuba. Through the efforts of the Cuban Consul at Montreal, a number of the industrial leaders of the Dominion will go to Havana, where they will be entertained extensively and receive an opportunity to study conditions in Cuba. Quantities of Canadian products will be taken along for exhibition purposes.

Cuba is one of the few countries from which Canada buys to a greater extent than she sells. In the last year 1924, Canada purchased from Cuba to the extent of $10,781,047, while selling to that country only to the value of $6,776,605. In 1925, the Dominion's purchases were $7,798,128 and her sales $7,142,406. In the last fiscal year Canada bought from Cuba to the value of $11,063,000 and sold to that country to the extent of $8,524,-000.

Forced To Abandon Flight

French Aviators Fail to Lower Non-Stop Record

Paris. — Sergeant-Major Arrachart, and Captain Arrachart, well-known brother aviators who started on a flight to Irkutsk, Siberia, in an effort to lower the long distance non-stop aeroplane record have failed. The French air ministry received a telegram from them saying: "Met bad weather in Eastern Russia. Returning as soon as possible."

Appointment Pleases Labor

Washington.—Labor, the official publication of the Railroad Brotherhoods and other railroad employees, gives great prominence to the fact that locomotive engineer, Hon. Peter Heenan, has been chosen Minister of Labor in the new Canadian cabinet.

Mr. Heenan, who is a member of the Brotherhood of Locomotive Engineers, is hailed as a veteran trade unionist. It says Mr. Heenan's selection is gratifying to organized labor.

To Try Another Swimming Stunt

Southend-On-Sea, Essex, Eng.—Norman Leslie Dereham, the Englishman who, on September 17, swam the English Channel, says he probably will attempt to swim from Mull of Kintyre, Scotland, to Ireland. The distance between Scotland and Ireland is only about 12 miles but with the tides it is probably Dereham will have to cover many miles to get across.

Speeding Up Airplane Flights

London.—Great Britain at present does not hold a single record in aviation. It is expected, however, that three aeroplanes now being built secretly by order of the air ministry, will develop a speed of between four and a half and five miles a minute. It is hoped that with these craft Great Britain will obtain a new world's record for speed.

Start Bridge Work on the H. B. Road

Moose Jaw.—Work of completing the Hudson's Bay Railroad is now under way and the bridge construction gang of the C.N.R. which has been working south of Moose Jaw is being transferred to a point north of The Pas where they will construct trestle bridges ahead of the steel. The large camp on the banks of the Moose Jaw creek was struck today.

During her 20 months in office, Gov. Miriam A. Ferguson, of Texas, granted clemency to 2,353 prisoners.

Canadian Poultry For United States

Government Certified Birds are in Demand in the U.S.

High school pupils who operate a community hatchery at Saybrook, Illinois, will use Canadian Record of Performance yockerels in their breeding pens next year, 186 ten week old cockerels from R.O.P. dams having been shipped to these young poultrymen by the R.O.P. Breeders' Association of British Columbia.

There are in every province of Canada organizations of poultrymen who have birds entered in Canadian Record of Performance. The birds of these breeders are trapnested on the home farm, under governmental supervision, and official records are issued by the Canadian Government for birds which lay over 150 eggs in a year, provided that the birds are healthy, free from standard disqualifications and that the eggs average over two ounces each. For birds which lay 225 eggs in a year advanced certificates are issued. These government certified birds and their progeny are sold through the associations and many sales in the United States and practically all sections of the world have been made.

Measure That Is Unreliable

Teaspoon Should Hold Dram But Size Varies Greatly

A teaspoonful three times a day after meals with a little water." That is often the direction seen on a medicine bottle, and the interesting question was raised recently at the meeting of the Pharmaceutical Association as to what amount a teaspoon should hold. It was said it should be a dram. Now go and see how many different sizes there are in teaspoons. Some would hold more and some less than a dram. Various suggestions were made at this meeting to overcome the difficulty, but eventually the decision was that it was not a subject for the association, but for the spoonmakers, and it was left to them. We do not suppose that in most cases a slight difference in size is a serious matter, but it is a curious question. It might be asked if all the medicine glasses agree in the amounts marked on them as representing so many teaspoons and tablespoons, and also what does a "pinch" of anything mean; a man would pick up more than a dainty girl's fingers.—Kingston Standard.

Says It Cannot Be Done

Impossible to Shoot a Projectile to the Moon

Rumors that somebody in Moscow wants to shoot at the moon has aroused the academic criticism of Professor A. W. Bickerton, the astronomer, who says flatly in the London Daily Mail, that it cannot be done.

"In order to escape the gravitation of the earth," he points out, "your projectile needs a velocity of seven miles a second.

"The thermal energy necessary to carry a gramme of matter at this speed is 15,190 calories. The energy of a gram of a Krupp shell is about 100 calories. The energy of a gram of our most violent explosive—nitroglycerine—is less than 1,500 calories. Consequently, if the explosive had nothing to carry except its own weight, it has less than 10 per cent of the energy necessary to enable it to escape the earth. To reach a distance of four miles in the air, the projectile would need a thermal energy unit mass equal to 7,500 calories. Where can we get such energy? Nobody knows."

An All-Round Boy

"How is it I never can find you when I want you?" asked the office manager. "First you're in the stock room, then in the factory, then down in the shipping department, and now here you are up on the roof. What's the big idea?"

"Well," answered the new office boy, "you advertised for an all-around boy—and that's me."—Christian Science Monitor.

Want Gold-Plated Radios

Radio is reaching the gold-plated age. Hundreds of visitors to the Radio World's Fair at Madison Square Garden, New York, are willing to pay high prices for sets with a gold plated finish, according to exhibitors. One exhibitor began with nickel plated sets, but the public soon demanded those finished in gold plate.

Nearly 150,000 persons in Austria are receiving government unemployment aid.

Mussolini has decreed that Greek and Latin classics must be included in the curriculum of Italian schools.

A fool friend can wield a hammer as effectively as a bitter enemy.

A Very Long And Severe Winter Promised

Washington Scientists Says It Will Last from Early Fall Until Late Spring

A winter which will begin early in the fall and end late in the spring which will bring "extremely deep snows" and which will be, in fact "one of the severest ever known on the North American continent," is on its way.

Should there be, before the first of the year, a great volcanic eruption anywhere on the surface of the globe, the Northeastern United States may expect in addition, a general snow storm about the middle of next June, a killing frost the latter part of that month, an ice-building freeze the night of July 4, and another equally intense early in August.

There will be, in short, in 1937, a recurrence of the "year without a summer," that made 1816 a year of memory.

But of even more immediate interest, perhaps, than these dire predictions is another forecast that emanated from the Thirteenth Annual National Business Conference, at Babson Park, when scientists and engineers discussed the weather in general and solar radiation in particular.

The time is possibly coming when radio fans, equipped with a forecast of the "radio weather" for weeks in advance, will be able to select with scientific surety the nights for "listening in" when they will be certain to hear to the best advantage and therefore plan quiet evenings with their books for dates far distant, when the static is certain to be terrible. It all depends, both the weather and conditions of radio reception, the speakers declared, on the sun.

Herbert Janvrin Browne, of Washington, D.C., is author of the alarming prognostications concerning the coming year. They were contained in Mr. Browne's paper "1927—A Year Without a Summer?"

The prediction concerning radio was offered by Greenleaf W. Pickard of Boston, consulting engineer and radio inventor of note.

New Invention Will Consume Motor Fumes

Menace of Carbon-Monoxide Gas said to be Overcome

A recent experiment in the city laboratories of Paris is said to have demonstrated the practicability of a "catalyzer" designed to consume the carbon-monoxide gas produced by motor cars—which Prof. Yandell Henderson of Yale and others have asserted was a serious menace to public health in crowded streets.

The device consists of an exhaust pipe containing certain chemicals possessing catalyzing properties which reduce the combustion temperature of the noxious gas. By the passage of a current of air through the tube the fumes are consumed before they can pass out into the street.

M. Kohn-Abrest, director of the laboratories, says that the average motor car in Paris gives off one-half cubic meter of carbon-monoxide for each half gallon of gasoline burned and that a cubic meter of such gas renders six cubic meters of air unfit to breathe. In the country the half cubic meter of gas is scattered along half a dozen miles and consequently is harmless, he says, while in Paris the automobiles move more slowly and often fill the air of narrow streets with injurious quantities of fumes.

Labor Conditions Healthy

Workers From United States Brought to Canada to Supply the Shortage.

The fact that the province of British Columbia this year could supply only about two-thirds of its quota of men for harvest work in the prairies is an indication of healthy labor conditions here. The principal fields for labor in British Columbia, in addition to agriculture, include lumbering, mining, fishing, transportation and manufacturing, and the fact that the required number of men could not be spared for the prairie indicates active business in these various lines.

Because of the shortage of labor on the prairies which could not be supplied in either Eastern Canada or British Columbia, an appeal was made for workers from the United States and many Americans entered the Canadian harvest fields.

It was one of London's grey days when one American greeted another American in Piccadilly.

"Lil' ol' London's got no skyscrapers yet," remarked one.

"Pity, too," answered the other gazing heavenward. "I never saw a sky that was more in need of scraping."

A friend is one who applies the brakes when he sees that you are going down hill too rapidly.

Watch Pressure In Your Balloon Tires

Under-Inflation Causes Treads to Wear Out Faster

Do you watch the pressure in your balloon tires?

Carelessness in this important detail may cost you thousands of tire miles if persisted in.

Under-inflation causes treads to wear out faster, and balloon tires in this condition are also easy prey for stone or curb or car track bruises, injuring the cord fabric which sooner or later produces blowouts.

Once a week is not too often to check your balloon tire pressure. The pressure should not be allowed to drop more than three pounds lower than the recommended standard before inflating again. When starting on long trips, with capacity loads, it is advisable to put a couple of extra pounds of air into the rear tires as a margin of safety.

A Queer Jewish Law

Death of Groom's Parents Only Excuse for Postponing Wedding

A wedding which took place in Leeds was followed within two hours by a funeral from the bride's home. The marriage of Miss Yenta Watterman was arranged some time ago to take place at the local synagogue. The day before the wedding her mother died. A rabbi stated that only in the event of the death of the late bridegroom's mother or the bride's father could the wedding be postponed. According to Jewish law, neither the bride nor bridegroom is allowed to mourn within a period of seven days from the wedding ceremony. They, therefore, did not attend the funeral. After seven days the brides must enter a period of mourning for seven days. No rabbi in the city could recall a similar occurence.

Promoting Better Homes

Women's Institutes Represent an Organized System in Canada

In no country of the world today is there such an organized system to promote better homes as in Canada, particularly in the rural districts. The Women's Institutes are to be found in every community with well worked out courses in home economics provided through them by the Department of Agriculture. Home nursing, sewing, serving, millinery and all the allied home arts are taught in short courses.

An Aberdonian went into a chemist's shop and asked for three-penny worth of arsenic.

The chemist inquired what he want ed for.

The Aberdonian replied, "Twopence."

Speeding Up Farm Life

The Automobile Making a Vast Change in the Life of the Farmer

Life in rural Canada is definitely speeding up. That would be a safe guess with any one, and now and again evidences is specifically presented. The other day an Ontario farmer bought a motor car for the reason that without it he could not keep up with the procession. "If I go to a funeral or get into heavy traffic anywhere, I am just in the way and hold up every body else with my horse," he said. So he joined the majority and decided to drive with gasoline. He will make his 25 miles an hour now with his neighbors and with the strangers who invade his roads.

Rural driving used to be a leisurely affair. If the horse wanted to walk, well and good. If the driver was impetuous he used a whip to secure a trot. As for a procession of any kind, a three-miles-an-hour pace was the practice. A good road horse might maintain eight miles an hour. Under such conditions a farmer's radius of intercourse would seldom exceed ten miles. Now he may go twenty-five miles after supper and return, and on a week-end may go a hundred.

It is a changing world, and the farmer who bought a car to keep up with the procession was basing in with the times.—Toronto Globe.

An Ingenious Wasp

Built Home in Centre of Spool of Silk

The ingenuity of a wood wasp who took possession of a reel of silk and built a home in the hole in the centre of the reel, is related by C. P. Jenkinson, Leigh, Westbury, Wilts., in a letter to a London newspaper.

The wasp, after inspecting the home-to-be, sealed up one end with a cement made of mortar gnawed from a wall. Inside she built four cells, and later they were found each to contain five caterpillars and an infant wasp.

A Theory About Food

The Germans are notorious for their big appetites, often eating as many five meals a day. An explanation may be found in a theory advanced by Dr. Friedberger of Greifswald University. He says their food is too thoroughly cooked. In one year's experiments Dr. Friedberger discovered that freshly cooked food more quickly satisfied hunger, nor was as great a quantity required as when he dined on "overdone" food. Subsequent experiments confirmed the theory.

Some people act the fool intentionally, while others who have no histrionic ability whatever attain similar results.

Has Own Fire Brigade

St. Paul's Cathedral Also Has its Own Water Service

St. Paul's Cathedral in London has its own private fire brigade and water service, says Tit-Bits. The water service was installed shortly before the World War. Though the cathedral does not appear to the casual observer as being a building that would burn easily, being mostly of stone, there are hidden away in the thickness of its walls and elsewhere in its interior several hundred passages, corridors, rooms, staircases and cupboards composed largely of wood.

The great outer dome, which is to be seen from the street, also is made of wood incased with lead. Another reason for the fire brigade is the fact that most of the wood in the structure is many years old and unusually dry, making it excellent timber in event a fire should start in the building.

The Perils Of Lightning

Motorist Runs as Much Risk as a Pedestrian

When lightning threatens it is always safer to be in a building than out of doors, and to be in a town than in the open country. In the open country trees and high ground should be avoided, particularly isolated trees and those at the edge of a wood.

In a wooly country the proximity of tall trees is dangerous. In a high, open country, a ditch or dike should be sought when the storm is severe.

The insulation afforded to the motorist by the tyres of his car is extremely small, owing to the enormous energy behind a lightning flash. In the open a motorist runs as much risk as a pedestrian, and cars should not be stopped under trees or close to wire fences.

An Unknown Poet

Few People Know Who Wrote "The Death of Nelson"

Although this phrase, a line from "The Death of Nelson," is known wherever Britons are to be found, probably not one in ten thousand could name its author; for he was not among the great poets, although he wrote not only this great song but also the equally well-known song, "The Anchor's Weighed." His name was Arnold, and his father had been organist of Westminster Abbey.

"The Death of Nelson" as a song owes its popularity to two great tenors of the past, John Braham and Sims Reeves. John Braham composed its rousing tune, and, like his successor, Sims Reeves, sang it hundreds of times.

A Washington woman was recently arrested and fined for driving an automobile with one arm around her pet poodle.

1.—Lieut-Governor Perodeau and Mrs Ivonne McKenna. His Honor is wearing the coat that was made in a day.

2.—The wool that became a Lieut-Governor's coat in one day.

From Sheep to Governor in 12 Hours

When the prize sheep of J. T. Brethour's herd at Burford, Ontario, opened his sleepy eyes on the morning of August 28th, he little thought that in scarcely more than twelve hours his luxuriant back would be worn as a top-coat by the Lieutenant-Governor of the Province of Quebec.

But that is just what happened and how the feat was accomplished was related by His Honor Lieutenant-Governor Narcisse Perodeau, who referred to the smart garment he wore in opening the Canadian National Exhibition in Toronto recently.

"This overcoat dropped from the skies," stated his Honor, which is just what it did.

Since no Lieutenant-Governor of a sister Province had appeared at the Canadian National Exhibition in an official capacity for over 20 years, the Executive of the Canadian Woolen and Knit Goods Industry decided to mark the presence of the Hon. Mr. Perodeau in this way.

At 5 a.m. the best sheep in the herd of Mr. Brethour was shorn at Brantford by his nephew, Mr. Russell Templar. By 2 p.m. the wool had been scoured, dyed, blended, carded, spun, warped, woven, finished and shrunk, and a fine piece of herringbone tweed was given to Mr. Quinlan, a Brantford tailor. By 4 p.m. the coat was finished and ready to wear.

Then in a watertight package it was rushed by motor to a flying field, picked up by aeroplane and brought down at the Exhibition by Parachute Jumper J. L. Clapp, who jumped from the machine into the water, where he was picked up by a motor launch at exactly 5.45 p.m.

The Hon. Mr. Perodeau was accompanied by his daughter, Mrs. Yvonne McKenna, his A.D.C., Lieut.-Col. Prudineau, His Honor Mr. Cockshutt, Lieut-Governor of Ontario, Miss Cockshutt, and Colonel Fraser, all six being dressed in "All Canadian" costumes. His Excellency, during his visit to the Exhibition inspected the Canadian Co-operative Wool Growers' exhibit, which consisted of a miniature factory, operating machinery, and samples of many finished and raw products from all provinces in the Dominion. He also made a special visit to the Canadian Pacific exhibit and expressed his admiration of the model train from Wembley which is electrically lighted and operated and runs in front of a frieze which takes the observer from Quebec to Vancouver.

Doing Away With Sleep

Chemists May Succeed in Making Sleep Unnecessary

One cannot read the proceedings of the American Chemical Society, in session recently at Philadelphia, without having the suspicion that we are soon to live in a new world. The chemists are duplicating the performances of nature so effectively, in giving us the odors of flowers, the flavors of fruits and spices and so on, that we must not be surprised they have now reduced all disease to a matter of chemical action, and propose to find cures in appropriate reagents. Their latest propositions are to make our foods by synthesis, instead of waiting for the slow process of cereal growth, and to enable us to do without sleep by supplying the needful drug to the blood.

The caprices of fashion have played havoc with many industries of late—notably the makers of decorative combs, hairpins, hatpins and hair nets—and now the manufacturers of beds and boudoir furnishings are menaced by the chemists. Incidentally, if synthetic foods come into vogue, the farmer will be put out of business.

It is difficult indeed to visualize and contemplate a world in which men and women will not need to sleep. Instead of going to bed, as they have been doing since the dawn of time, the chemists tell us all they need to do is to swallow one or two pellets of the particular chemical which sleep creates in the human system, and then go about their business with regenerated energy. The economic possibilities of such a change are beyond computation. But the thing may not happen. These wise fellows, who toss atoms and electrons about in retorts and test tubes, have not yet identified the particular drug which will meet the physical requirements of sleep. They suspect its character, and are already chasing it in their laboratories; but they haven't got it lassoed yet. Experience warns us, nevertheless, that when they get after anything in dead earnest they generally run it down.

There is one bright aspect of the matter. If the chemists succeed in making sleep unnecessary, there will be no more snoring.—Ottawa Journal.

School Days

When Thoughts Return to the Little Red Schoolhouse of Former Days

Perhaps the Hinckley News is right when it says that the children of today go back to school with lighter hearts than the children of the generation now doing the business of the world. Our contemporary thinks this is so because the schools are brighter, books more interesting, methods more elastic and ways of getting to school easier than they were in days gone by.

No one will dispute this very strongly. Certainly the modern public school and private schools are made very comfortable for the young. Certainly Intelligence is higher in the teaching department. At the same time it is permissible to think affectionately of other days. At least it is an associate of youth, which goes away so fast.

It is permissible, too, to recall the room where studies and recitations went together, the pail of water with the one tin cup in the corner, the healthy lack of fear of germs, the joy of vigorous life in days now gone.

But the school of today is a wonder. Most of the folks don't know the half of it.

Toronto Fair Made New Record

A new high record for attendance at the Canadian National Exhibition during the two weeks it operates has been made this year, 1,573,000 people having passed through the turnstiles from the opening on August 28 to the closing night. The former high record was 1,515,000 made in 1924, and the figure last year was 1,491,300. The Canadian National Exhibition is unique in being the greatest annual exhibition in America, if not in the world.

New Treatment For Partial Blindness

Ultra-violet rays are being used successfully to treat cases of partial and incipient blindness at Moorefields Hospital, London. More than one hundred persons have been treated and the results have been so encouraging that the equipment is being multiplied. The treatment has been peculiarly helpful for the eye diseases arising from tuberculosis. It is given locally by a rod applied to the affected part through which the rays are sent in a concentrated form.

No More Liquor Ads

Punch, London weekly, has decided hereafter to refuse to print advertisements of liquor. After the existing contracts expire no new ones will be entered into for such advertisements. No explanation for this revolutionary move has been offered.

Mapping Spread Of Trees In The Prairie Provinces To Ascertain Rate Of Growth

Mapping the spread of trees in the prairie provinces with the object of ascertaining the rate at which that spread goes on, is one of the latest activities in which Prof. V. W. Jackson, of the Manitoba Agricultural college, and other authorities on arboriculture, are engaged.

The mapping is being done in connection with a systematic campaign to have more of the prairie covered with trees than is at present the case and yet in no way interfere with agricultural development. With the exception of comparatively narrow strips of land along the banks of rivers, streams and lakes, the prairies were treeless up to the last century, according to Prof. Jackson, who in a statement quoted LaVerandrye, the first white man to explore western Canada, as expressing his surprise at the lack of foliage on the prairies proper whereas some of the districts through which LaVerandrye passed are now practically covered with trees.

So far, the spread of the poplar has been the most remarkable to be noted, according to Prof. Jackson. All through Saskatchewan "poplar islands" are forming and increasing in size, and it appears that the poplar spreads all the more rapidly as new land is broken for agricultural purposes. It is only a matter of a few generations until there will be no such thing as a treeless stretch or prairie of any great extent, Prof. Jackson states.

While the poplar is easily first in the way it adapts itself to the conditions of the prairies, satisfactory results are being obtained with oak and elm. Acorns, which have been sent to Beaver Lodge, Alta., and Red Deer, Alta., have germinated and the saplings give promise of developing into lovely trees. Elm seeds which have also been planted in Alberta have likewise germinated, and as in the case of the oaks, the progress of the elm saplings is being closely watched.

Healthy Livestock In Saskatchewan

Work in Connection With Tuberculosis Test Shows Few Reactors

The first test in the area for the eradication of bovine tuberculosis in the six rural municipalities east of Long Lake, Saskatchewan, has recently been completed. This work was conducted by the Dominion Department of Agriculture and some assistance was given by the Provincial Government and the rural municipalities. In all 21,284 head of cattle were tested and only 176 reacted, or less than one per cent.—.83 per cent to be exact. This shows that Saskatchewan live stock are in a very healthy condition, and it is hoped that farmers in the restricted area will endeavor to improve the quality of their stocks by making it a pure bred sire grea as well.

Effeminate Youth

Chicago Doctor Says Thymus Glands Responsible for Vagaries of Present Generation

The trouble with the "effeminate youth and mannish flappers" of the present generation is that their thymus glands have continued to operate after their development from childhood, Dr. Victor H. Lindlahr, of Chicago, told the Ontario Drugless Practitioner's association in annual meeting here at Toronto. Dr. Lindlahr said the fact that the thymus glands were operating beyond their proper period was due to the softness and luxury which the march of science and civilization entailed in the lives of the average person of 1926.

Surprised When He Saw Canada

Mr. Alfred Bishop, who came to Alberta from the United States, has written back some of his impressions of the country to Mr. O. G. Rutledge, Canadian Government Agent, at 301 E. Genesee street, Syracuse, New York. Says Mr. Bishop: "I am going to tell you what I think of the Canadian West. I was surprised when I saw the amount of wheat grown in Canada. This country is the land of opportunity—and there is plenty of it."

Had To Be Careful

The wife of a dying man sent out for a preacher to come to the bedside of her husband, who was no better than he should have been. The preacher came and said, "You had better renounce the devil, my friend."

"Renounce the devil!" exclaimed the dying man. "Why I am not in the position to make any enemies now. —The Outlook.

History Rich With Myths

Many Famous People Believed Clever After They're Dead

Strange stories concerning the reappearance of famous people after their death provide an interesting number of myths that refuse to perish.

Just as Lord Kitchener was supposed to be alive in Germany during the war, so the late General Hector MacDonald was credited with existence after his death.

Soon after the untimely end of this popular soldier, who rose from the ranks, a rumor said he was a "Chinese General" drilling troops for the late Dowager Empress. The myth gathered strength as the years went by, until a returned traveller from Pekin wrote of the "lordly palace of Jade whereby he has seen the British general dressed as a Chinaman, revered by all." It lives to this day.

Wellington's gigantic funeral was not sufficient to bring conviction as to his death.

For many years afterwards a rumor credited him with being "kept a prisoner" in Apsley House. Many visitors to the Metropolis would peer wonderingly at the imposing exterior of the mansion in the hope of catching a glimpse of the captive "Iron Duke."

It was but natural that the butchery of the Czar and his family should breed legends of a marvellous character. Just as "the Czar's youngest daughter" is reported alive in various parts of Europe, so there are hundreds of thousands of Russians who credit the myth that the late Czar is living as a peasant monk, devoting himself to charitable deeds.

It is but a few months ago that a story appeared in several newspapers in Russia reporting that a monk appeared in Moscow. After showing kindness to a poor Jew, he is reported to have revealed himself as "he who was once called 'Czar.'"

History is rich with myths and marvels that defy Time.

Discover Missing Link

Complete Skull of Ape-Like Creature Is Found in Java

British anthropologists were thrilled by a despatch from Batavia, Java, which said Professor Humbarcin of the Netherlands Government Medical Service has discovered at Trinil, in Central Java, a complete skull of the pre-historic ape-like creature termed by the laity the "Missing Link," and by science pithecanthropus erectus. The despatch said the skull was found at the same place where Professor Eugene Dubois, of Amsterdam University, discovered in 1892 the upper part of a skull, two teeth and a thigh bone from which was reconstructed the previously unknown ape-like human being designated as the "Missing Link."

Professor Humberlein's specimen which the despatch said is complete and sound, will be kept in Dutch East India, as exportation of such relics is prohibited.

Miss Mildred Tildesley, who has catalogued more than 6,000 skulls at the Royal College of Surgeons, believes if the reported discovery is true it is the most important in years.

Dr. Dubels' famous discovery was made on the left bank of the Bengarian River near Trinil. Much discussion followed with many authorities opposing Dr. Dubois' theory. The creature was not held to bridge the entire gulf between man and the ape, but some scientists argued it constituted a further piece of evidence in that direction.

Needlessly Alarmed

British newspapers are considering the condition of Canadian newspapers, which they fear are becoming more and more Americanized, and are wondering what they can do about it. They are needlessly alarmed. Canadian newspapers may be American in appearance and to some extent in methods and news, but in heart they are far from American. They are nearer British in ideals than they are American.—Calgary Albertan.

Looks Like Over-Production

President Angell, of Yale, said at a New Haven tea:

"The books in the Yale library double in number every 20 years. They total now 1,300,000. Every year 50,000 new books are added, that many old books being stored away to make room for them. Books, books, books!

"Of course," he added, "all is not literature that litters."

Be careful to wash your face and hands thoroughly — I'm expecting your Auntie!

But suppose she doesn't come?

Making Use Of Nature

Invention Has Made Gas-Buoys and Lighthouses Automatic

An invention of which landsmen know little, yet which saves their pockets to the tune of tens of thousands yearly, is the so-called sun valve by means of which gas buoys and lighthouses are rendered automatic.

Inside a gas buoy can be stored enough acetylene gas to burn for six months if the light can be turned down in the daytime. To do this work by hand would mean the employment of hundreds of men and launches, and would often be impossible owing to bad weather. But by means of the sun valve the can is made to do the work. As day breaks the action of the light on a certain substance causes the tap to be turned so that the acetylene flame burns low. When twilight comes again the diminished daylight causes the flame to rise again, so that gas is only being consumed during the hours of darkness. Even a heavy fog causes the light to burn up brightly.

There is also an electric-light buoy of which the light is generated by a mechanism worked solely by wave action. This gives a more powerful light than the gas buoy, and, once installed, goes on working indefinitely. India has a turbine driven by a stream of water flung by a pump, and this pump is worked entirely by the rise and fall of the buoy on the waves. Even a gentle swell will do the trick. The turbine runs the dynamo and the dynamo produces the light.

Busy Bees In Manitoba

Big Increase in Honey Production Reported This Year

Manitoba reports a big increase in honey production for the fifth year in succession. Honey production for many years has been a profitable industry in eastern Canada, but it was really only about six years ago that the honey crop in Manitoba began to be important. It has increased during the last five years from 902,000 pounds in 1920 to 4,107,000 pounds, valued at $616,068.00 in 1925. This tremendous increase in output has effectively proved that Manitoba's climate is well suited for the production of honey. This year the production will be even greater than last.

Advance of Japanese Women

Japan has its Council of Women, and at the recent annual meeting the Empress of Japan attended in person and read the opening address. She was supported by one of the princesses, as president. At this meeting, which was held in a gaily decorated building in which the national colors were much in evidence, the Imperial ladies discarded their national costume for European dress.

Parker—"Why do you call Robinson 'Skipper'? He was a sea captain in his younger days, eh?"

Stanfield—"No. He was an embezzling bank cashier."

Record "Muskie" From French River

This record breaking muskalunge of the season, 55 pounds in weight, was taken from the waters of the French River at the Canadian Pacific Bungalow Camps, by E. A. Farintosh, of the Carnegie Corporation of New York City. Farintosh and his guide had a twenty-five minute battle with this monster muskie before it was finally landed. Twice it leaped clear of the water and three times it took more than 75 yards of line.

Disease-Free Potato Seed

Efforts to Produce Seed Potatoes Free From Disease

Efforts made by the Dominion Experimental Farms and Stations to bring about seed potatoes immune to disease have at least been partially successful. Five years ago the Garnet Chili, imported by Bermuda from this country was found unsatisfactory because of leaf-roll-disease present in the seed stock. An attempt at rejuvenation was not found satisfactory and was discontinued. Hill-selection has, however, resulted in the production of plots of vigorous seed from which diseased and weak plants have been eliminated and which have given thirty per cent increased yield over uncelected stock, says Mr. W. K. McCulloch, district inspector, in his report to the Dominion Botanist. A steady improvement has taken place in the Garnet Chili stock as a whole, and in 1925 the Director of Agriculture for Bermuda reported the seed as being the "best ever imported." A start has also been made to isolate disease-free, high yielding, pure lines of Irish Cobbler, Green Mountain, Bliss Triumph and Garnet Chili varieties. The majority of selected units reports Mr. McCulloch, have retained their disease-free character for two seasons and it is hoped in time to have a disease-free nucleus of many of the popular varieties.

Shipping Buffalo To North

Movement of 2,000 Buffalo of Wainwright Herd is Proceeding

As previously announced, the Department of the Interior is sending another shipment of buffalo from the Buffalo National park at Wainwright, Alberta, to the Wood Buffalo park near Fort Smith, Northwest Territories. This is the second movement to be made from the herd of 8,000 at Wainwright, the former having been made last year when 1,634 young animals were shipped approximately 700 miles north to their new home on the Peace river.

The first of this year's shipments was made from Wainwright on June 29 routed by rail to Waterways, Alberta, and thence by scow to a point on the Slave river a little south of Fitzgerald. This landing place is a considerable distance north of the one used last year and was selected owing to the superior facilities offered for the landing of the buffalo.

Since June 29 shipments have gone forward at the rate of 200 to 250 animals per week and will be continued until the whole consignment of approximately 2,000 buffalo has been transferred.

Black Bass in Alberta Lakes

Large mouthed black bass may soon be available to Alberta sportsmen for a batch of fingerlings and yearlings from the Kootenay Lakes have been placed in Lac La Nonne by the Northern Alberta Fish and Game Protective Association.

Mythical Figure Of John Bull Is Linked Up With The History Of The British Empire

Linked up with the history and personification of the British Empire is the familiar, if mythical figure of John Bull—a sturdy fellow, garbed in red waistcoat, leather breeches and armed with a stout oaken cudgel. Writing in a recent issue of John o'London's Weekly, "Washington Irving" expresses the belief that it is characteristic of the English, and their love for what is blunt, comic and familiar, that they have embodied their national oddities in such a figure.

"According to history, the moulding of 'John Bull' began in the year 1712, when John Arbuthnot, physician to Queen Anne, and a friend of Swift and Pope, published a pamphlet, "Law is a Bottomless Pit." Exemplified in the Case of Lord Strutt, John Bull, Nicholas Frog, and Lewis Baboon, who spent all they had in a lawsuit." Then, again, the name may have originated as a result of the theological controversy following the exit of James II., when the Dutch portrayed England, Scripiats, as a lion, a bull, and sometimes a bulldog, indicating, no doubt, our determination and tenacity.

Gillray and Rowlandson are two prominent caricaturists who have played no small part in fashioning John Bull. The former's famous delineation was that of "John Bull Taking a Lunch," in which he is depicted after the Battle of the Nile, making a meal of ships, with Admirals as waiters. "John Bull's Turnpike Gate" is perhaps the best known of Rowlandson's efforts, the sketch showing "John" demanding payment of the toll. The toll referred to the taking of the Test Oath for the purpose of keeping Romanists out. Despite the fact that these two contributors were well known, it could not be said that either representation of John Bull was flattering.

It required the hand of Isaac Cruickshank to introduce a tone of refinement by making his John Bull a well-dressed squirish personage, "reminiscent of the Pickwickian type in appearance." This marked improvement was further accentuated by the work of John Doyle, John Leech and Sir John Tenniel. For the John Bull as we recognize him today we are indebted to the genius of the last-named artist, whose work was ably perpetuated by Sir Bernard Partridge.

Opinion will vary as to whether our present conception of John Bull really exemplifies in the highest degree the characteristics of the British race. Nevertheless, the sturdy figure undoubtedly symbolizes strength, tenacity, and determination, three traits of which we are justly proud.

German Invents New Rifle

Compressed Air as Motive Power Eliminates Roar of Discharge

The next war will be carried on without the proverbial cannon's roar and the rattle of musketry and machine guns, if a Berlin locksmith, Hermann Pileth, is able to apply to larger caliber weapons the principles which have been successful with small caliber rifles. Using compressed air as motive power his new gun drives projectiles through three millimeters of steel at a distance of 2,000 meters, and the report scarcely is able to be heard by observers, according to the Acht Uhr, which states tests were conducted in the presence of Reichswehr officers.

The new rifle has the additional advantage of carrying 25 shots without reloading and can be fired automatically.

Pileth maintains the strictest secrecy concerning his method of compressing the air, and how it is possible to control the pressure so that the 25 projectiles are given uniform velocity. He has offered his invention to the German Government for $1,500,000, but says he will destroy it before allowing another country to obtain the secret. The inventor claims the same principles can also be applied successfully to large weapons.

Cement Friendship In Unique Manner

Ontario and New York State Farmers Hold Plowing Match

Of all the things that have been done to signalize the long years of friendship between Canada and the United States, the most unique will be the international plowing match on the old battlefield of Landy's Lane in the Niagara district which will be held between farmers of Ontario and of New York state.

We have celebrated the century of peace between Canada and the United States, Memorials have been erected at certain points on the 4,000 miles of unfortified boundary and we have lately had goodwill parties of each country visiting and being welcomed by the other. But none of these things was quite so striking as this transformation of the scene of deadly conflict into the peaceful scene of a friendly competition between men of the two countries who live by the soil.

Livestock And Hog Pools Are Uniting

Saskatchewan Organizations Have Completed Arrangements for Union

An agreement by which the Saskatchewan Hog Pool and the Saskatchewan Livestock Pool unite has been completed. Officers announce that the livestock pool is now half way toward its objective of contracts covering one thousand carloads a year and it hoped to have the pool in operation by the beginning of the year. To enable the pool to acquire handling and processing facilities, the livestock pool contract has been revised to make provision for deductions not exceeding two per cent of gross receipts from the sale of livestock.

New Process For Making Hay

Invention by Chicago Man is Being Tested Out

Farmers can make hay when the sun is not shining, if the invention of Arthur Mason, Chicago, which had its first demonstration at the Walker-Gordon dairies near Princeton, N.J., becomes popular.

The Mason invention takes alfalfa grinds it to meal, all winthin 30 minutes. A strong air furnace forces gasses over the grass as it moves through a 150-foot oven, on an endless belt. Smoked hay, supporters of the new process assert, is more palatable.

Queer Chinese Custom

One of the queerest of the Chinese customs that is sometimes followed yet in Chinatown is that of serving, in orthodox Chinese fashion, a thirty course meal. It includes, among other things, cabbage that has been baked as dressing in spring chickens. But the Chinese throw the chicken away instead of eating it.

Opportunity for British Boys

Major Ralph Glyn, member of the British House of Commons for North Berkshire, visited Western Canada for the purpose of investigating opportunities for British boys in this country. He is preparing a report along these lines to be presented to a special committee of the Imperial Parliament.

Shot Bears In Arctic

Woman Hunter from California Returns With 29 Pelts

Experienced Polar hunters doff their hats to Miss Louise A. Boyd, San Rafael, Calif., who has returned to London after a six weeks trip in the Arctic.

To Miss Boyd belongs the distinction of having been the first woman to set foot upon desolate Franz Josef Land to which she made the voyage in Roald Amundsen's old supply ship Hobby. With Miss Boyd were Miss Janet Coleman, San Francisco, and Count and Countess Rivadavia, friends of King Alfonso XIII. of Spain.

From the 80th degree northern latitude Miss Boyd returned with the pelts of 29 polar bears, six of which she shot in one day. This it is considered is enough to turn envious any Arctic hunter.

The party captured five cubs alive. Of the best of these Count Rivadavia will present one to King Alfonso.

Miss Boyd took 24,000 feet of film, besides 700 photographs of Arctic scenery.

Expects Warm Welcome

Lady Willingdon has been spending most of August in London. "This is going to be a big change for you," I ventured. "Yes, indeed," she agreed, it will be from 'China to Peru' almost literally." I asked her how she thought she would like the Dominion after so many years in India. "We are sure to feel the cold," she said brightly, "but I am assured that the warmth of our welcome will more than compensate for that." —The Passing Show, London.

Homestead Entries

A total of one hundred and forty-two homesteads and eight soldier grants were allotted upon at the Edmonton Dominion Land Office during the month of August. This is a marked increase over the corresponding month of last year.

WORLD HAPPENINGS BRIEFLY TOLD

Crown Prince Leopold of Belgium rode into Stockholm in a third-class sleeper when he arrived to make final arrangements for his marriage to Princess Astrid. He found all the first and second class reservations taken.

Houses built of Canadian lumber after a Canadian pattern are to be given a trial in England after several years of agitation to this end. The London county council is the first to try building Canadian houses here.

The New York World says negotiations for the sale of the Sun and Telegram for approximately $5,000,000 by the Frank O. Munsey estate to a group of men now publishing the papers are about to be closed. The group of purchasers is said to include editors and executives of the two papers.

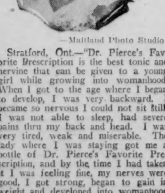
The 2,000 family settlement scheme in which the Canadian and British Governments have been co-operating is likely to be extended in scope and continued for a further period, according to Lord Clarendon, chairman of the British overseas settlement board.

The Prince of Wales is so far behind on his dinner engagements that he has called a halt on further invitations until he can catch up. His private secretary has announced that he *must decline all invitations except to functions of national or imperial character.*

Queen Marie will grant no interviews during her forthcoming visit to Canada and the United States. She will not be accompanied by any official press agent and all information concerning her movements will be given out by a member of the legation staff at Washington who will accompany her.

George Michel, the French baker, who recently swam the English channel in the record time of 11 hours and five minutes, is said to have accepted, through Georges Guillot, his manager, a cable offer from Montreal for a 20 weeks' music hall exhibition tour at $500 a week. Michel is now awaiting the money to pay for his transportation.

Watch Your Daughter!



— Maitland Photo Studio

Stratford, Ont.—"Dr. Pierce's Favorite Prescription is the best tonic and nervine that can be given to a young girl while growing into womanhood. When I got to the age where I began to develop, I was very backward. I became so nervous I could not sit still. I was not able to keep my severe pains thru my back and head. I was very tired, weak and miserable. The lady where I was staying got me a bottle of Dr. Pierce's Favorite Prescription, and by the time I had taken it I was feeling fine, my nerves were good, I got strong, began to gain in weight and developed into womanhood naturally and never had any more trouble."—Mrs. Stanly Tozer, 183 Railway Ave.

Any drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg.

Hurricanes Give Warning

Barometer Falls and Death-Like Stillness Precedes Storm

Twenty years ago, a storm similar to the recent one that devastated the Florida and Gulf coasts swept down on Pensacola and Mobile with considerable damage not only to these two cities but to the towns and villages for miles around, writes William J. Carver in the New York Evening World. In such a hurricane there is ample warning of the onrushing disaster. Down goes the barometer, only, however, for a certain area, sometimes a swath thirty or fifty miles wide. The low pressure causes a partial vacuum that accounts for the death-like stillness that precedes the descent of the storm. Air from the areas surrounding the path of the storm rushes in to fill the vacuum and then you have the storm with all its force and vengeance. It is the rush of air from all directions to fill the partial vacuum that causes what is called the West Indian hurricane.

Joint Stiffness Goes, Swellings Disappear, Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nerviline. "For the minor pains and ills that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia and Colds. 35 cents at all dealers.

No Old-Time Sailors

Despite the fact that 365,000 seamen avail themselves each year of the seamen's church institute, New York, Rev. Mr. Cumpston, the chaplain, who spent his youth before the mast, stoutly insists that there are no seamen today. With the passing of sails, he says, there has come a new type of sailor to man the ships, and the traditional "salt" is now only a character of history.

Relieves Catarrh Almost Instantly!

Nasal catarrh clogged nostrils, obstinate and annoying head colds, dull headaches, buzzing head noises—no matter how bad—you should almost instantly, by the amazing power of Geero Wormwood Balm. A delightfully clean and pleasant home treatment, positively harmless to the most delicate tissues, but powerful enough to break up congestion, allay inflammation and kill germs within a few minutes. Your throat and nasal passages are cleaned like magic—even the body and easily as nature intended—and your dull old head feels clear and clean.

To prove that this is absolutely true and to quickly introduce the treatment to thousands of catarrh sufferers who need it—all druggists are now authorized to supply Geero Wormwood Balm on a strict guarantee of swift, sure satisfaction or money back! No matter how many treatments you have tried without success—if you really want to be freed from catarrh, don't miss this opportunity to try Geero Wormwood Balm without slightest risk of cost unless pleased with results. A 90c box will last for weeks.

To Study Pool

United States Experts are Studying Co-operation Method in Canada

The United States department of agriculture, through the new division of co-operative marketing, has sent experts to Canada to make special studies of co-operation there. Studies are being made in particular of co-operation in handling wheat and livestock. The methods of the wheat pool of western Canada are being carefully inquired into.

The purpose of the investigation is to accumulate data on co-operative methods which can be disseminated among farmers and farm organizations in this country for encouragement and guidance of the co-operative movement.

His Birthday Surprise

Astronomer (to his young wife)—Congratulations, my dear. This is your birthday, and I shall have a great surprise for you tonight.

Wife—What is it?

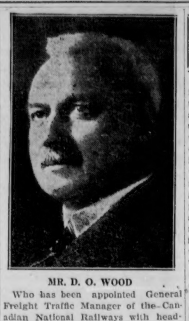
Astronomer—At 11.30 tonight there will be a total eclipse of the moon.

He: Ah, darling, as we sit together under the spreading branches of this noble tree, I declare on my honor that you are the only girl I ever loved.

She: You always say such appropriate things, Paul. This is a chestnut tree.—Tit-Bits, London.

An instrument so sensitive that it records the messages sent to the brain of a frog when the creature's skin is gently pinched, has been invented by an English scientist.

Ignorance and conceit are twins.



MR. D. O. WOOD

Who has been appointed General Freight Traffic Manager of the Canadian National Railways with headquarters in Montreal.

1310

Simplicity of Line for School Days

Flannel shows up smartly for this frock in a two-tone combination. It is a slip-over model, with the skirt front pocket and Peter Pan collar in a plaid design. Long sleeves slightly full at the wrist are gathered into band cuffs. The back is plain and a narrow belt ties in the centre back. The pattern is perforated for low round neck and short sleeves finished with cuffs. Any of the lighter weight woolen materials could be chosen for frock No. 1310, which is in sizes 8, 10, 12 and 14 years. Size 10 requires 2¾ yards 32-inch material. 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Friendship Better Than Hate

League of Nations Breaking the Chill Ice of Distrust in Europe

At Geneva, Foreign Minister Briand of France held out both hands to the German delegates to the League of Nations and pledged his country's friendship to Germany.

If the League wound up all its business now and disbanded, its whole creation would have been worth that one supreme moment.

For the chill ice of distrust in Europe is broken. After those words of concord and amity, no statesman of this generation would have the face to affront all decency by breaking that pledge.

Friendship is better than hatred. Europe is finding that out.—Vancouver Sun.

British Columbia Apples

It is estimated that southern British Columbia will produce 3,217,000 boxes of apples this season. This is about 700,000 boxes more than last year's production. Arrangements are being made for a heavy export business to Great Britain, as well as to the Prairies and Eastern Canada.

When a fool holds his tongue he isn't as foolish as he might be.

The Commanding Position Of Our Agriculture

By C. W. Peterson

The average person readily gives an intellectual assent to the statement that agriculture is our basic industry and the "backbone of the nation," but usually without any adequate conception of the fundamental facts of the case. It is a mere figure of speech. It is, therefore, well to consider briefly to what extent agriculture has been responsible for Canada's material progress. Forty-one per cent of our net production in the last census year was agricultural; thirty-three per cent was manufacturing; and our forests, mines, fisheries, construction, etc., account for the remaining twenty-six per cent. The eight billions of total agricultural capital in Canada represents 56 per cent of her total available wealth. Urban real estate accounts for 26 per cent, our railway plants, 10 per cent, forests, 5½ per cent, mines, 2½ per cent, and manufacturing equipment, 3% per cent.

It will thus be clear that Canada's agriculture looms up as the largest single factor in her economic life, and the farmers as the largest group of domestic consumers, consequently exercising a commanding influence in the general business conditions of the country. One-third of all revenue freight carried by our railways originated on the farm and another third at least, was represented in carrying commodities of all kinds back to the farm and the agricultural raw material to and fro. The Canadian farm not alone feeds the nation, but exports on such a scale that credits are available to balance our international obligations and create a favorable trade balance.

Besides the millions of farm workers directly engaged in producing, there are other millions earning their living by performing work connected with supplying the implements, tools, shoes, clothing etc., for the farmer, with the manufacture of raw material originating on the farm and the distribution and transportation of such commodities. Who is bold enough to attempt correctly to estimate the economic importance of agriculture in a country like Canada? It is perhaps well within the mark to assert that at least 80 per cent of Canada's total population, in every walk of life, depend absolutely on her agriculture, directly or indirectly.

These are imposing figures and should lead thinking men to speculate on the possible performance of Canadian agriculture were we in the happy position where more than a mere fringe of our agricultural area was on a producing basis. If, for instance, we were producing on even one half of our arable lands, instead of only one sixth, granting a fairly balanced population, all our present economic problems would vanish over night. The issue is not for hedging such a situation about. We have the undeveloped natural resources, the markets are there, we only need the man-power or to complete the circle. And that is purely a matter of intelligent, business organization.

Spoiling Precious Stones

As pearls consist of carbonate of lime, vinegar and other acids will eat away the polished surface in a short time. Hot water is fatal to an opal, destroying its fire and sometimes causing it to crack. Soap is a deadly enemy of the turquoise. If a turquoise ring is kept on the hand while washing, in a short time the blue stones will turn to a dingy green.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

First farmer—"That rainmaker is going to charge us $1,000 for that shower yesterday."

Second Farmer—"I'm. I suppose that's what they mean by saving up for a rainy day."

Well-Known Home Builder Quickly Restored To Health

Victim of Nervous Indigestion, Loss of Sleep and Intolerable Pain, Father of 8 Children, Finds Long-Sought Relief. Strength Restored. Praises Tanlac.

Joseph A. Brunet, a well-known Montreal building contractor, 2055 Boyer Street, says: "The brawn, muscle and splendid health of the strongest man will break under the strain of modern living.

"I was suffering untold agonies when I began taking Tanlac. My strength had vanished. I couldn't work efficiently, I couldn't enjoy life as other men did. I had lost weight and was wracked by knife-like pains.

"I was completely discouraged when Tanlac was recommended to me and I took it. I recommend it to anyone who is ailing.

"This tonic worked wonders with me. Quickly my old strength returned. I began to have a great appetite and ate everything without a sign of pain. Once more I knew what it was to have a good night's sleep. Tanlac certainly put me on my feet, made me stronger and gave me better health than I have had in years."

Tanlac actually banishes pain. Conquers ailments and builds up strength in famished bodies. It relieves the system of poison caused by constipation and sluggish liver. It is nature's own remedy made from roots, barks and herbs according to the famous Tanlac formula.

Banish sickness from your life and enjoy the benefits of golden health. Begin taking Tanlac. The first bottle usually brings results that will surprise you. Ask your druggist for Tanlac—today!

Why Some Candy Doesn't Sell

Quality candy often finds a slow sale simply because it looks "cheap." Inferior wraps discourage sales. But the Appleford wraps win new customers.

The richness of butter scotch shows through the transparency of Appleford wraps. Kisses are more tempting in Appleford's durable twisting tissue. Caramels look more attractive in the Appleford's neat-folding wraps. The slight extra cost is a good investment.

SUNDAY SCHOOL LESSON

OCTOBER 10.

THE REPORTS OF THE SPIES

Golden Text: We are well able to overcome it. Numbers, 13.30.

Lesson: Numbers 13.1 to 14.45.

Devotional Reading: Psalm 95.1-7.

Explanations and Comments

Twelve Spies Sent to Canaan.—verse 1-20.—At last an encampment was made in the Wilderness of Paran at Kadesh-barnea, near the border of the Promised Land. Then Moses sent twelve spies over the border to ascertain the nature of the land, whether good or bad, whether wooded or not to gain information as to the people, whether they were numerous or not, whether strong or weak, and also facts about how they lived, whether in cities, camps or households. He also directed them to bring back specimens of the fruit they found in the land.

"The time was now ready for the people, but were the people ready for the land? The report which Caleb and his campers was that nothing was to decide, not a question of geography, but a question of philosophy. It was to test the personality of the people of God, to determine whether the heart of Israel was ripe for its inheritance." (Dr. Charles Malbenom).

"What we do in the crisis always depends upon whether we see difficulties in the light of God, or God in the shadow of the difficulties." (Dr. G. Campbell Morgan.)

New Whistle for Locomotive

No longer will residents along the right-of-way of the Chicago, Milwaukee & St. Paul Railroad be awakened by the shrieking of locomotive whistles, in the opinion of Eugene Duval, local general agent of the road. Locomotives are being equipped with a new "chime" whistle, sounds from which are described by the designer, E. K. Silcox, as "soft as the wood-winds of a symphony orchestra."

Duval said that while the sound of the new whistle is mellow, it can be heard as far as the screech of the usual type.

Externally or internally, it is Good.—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissues, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

More than a million pounds of tea is required to supply the people of Great Britain with each day's beverage.

He (musingly)—I wish I had money enough to get married.

She (coyly)—What would you do?

He—I'd buy myself an automobile.

The population of India is three times that of the United States.

Feet sore?—Minard's Liniment.

Radio Advertising Costly

After Six o'Clock New York Rate is $600 Per Hour

Sometimes advertisers are inclined to think that the cost of newspaper space is big. When compared with the radio it is seen how moderate the cost of newspaper advertising is. The sixteen stations associated with WEAF, New York, charge $4,980 for an hour, $2,250 for half an hour, and $2,040 for ten minutes for what is called indirect advertising. The ordinary charge of WEAF is $450 an hour, and $240 for ten minutes. After 6 o'clock p.m. the charge is $600 per hour. However, in spite of these high figures prospective advertisers are standing, with cheques in hands and programs ready, seeking an opportunity to broadcast their advertisements.—Brantford Expositor.

Will Not Reduce Pensions

New Regulation Extends the Principle of the Irreducible Minimum

No further reduction will be made in the pensions of less than 50 per cent., providing that during treatment the presence of active disease was definitely established. This announcement was made recently by the Dominion headquarters of the Tubercular Veterans' Association, following negotiations with the board of pension commissioners. Last spring the board conceded the justice of an irreducible minimum pension of 50 per cent. for tubercular veterans in receipt of that amount or over. The new regulations extends the principle of the irreducible minimum rate of pension to those in receipt of less than 50 per cent.

Strange, Romantic Love Adventures of the Flapper you know

Joanna

(Continued.)

CHAPTER XVI

Joanna's Debut

It is only in the great capitals of the world that one may witness, or participate in, a gathering such as Yvonne Coutant delighted occasionally to preside over in her town house off the Avenue. They are not uncommon in Paris where a Prince of India may at any time transform a miniature palace in the Bois into an exotic fairyland for a wild, barbaric fete. They word brilliant punctuations in the Bohemian calendar of old Vienna, and in London, occasionally, a rampant beauty, perhaps a mannequin newly married to a duke, or a young duchess divorced from one, will celebrate by turning one night into enough extravagance to keep Mayfair gossiping for a month.

In America they are rarely accomplished. The demimondaine of Paris and the diplomat from London are not accustomed to ignoring the barrier between them when occasion arises. It is an extraordinary hostess, in America, who can successfully bring together all grades of society, not rich and poor, so much, as the good and the not so good.

Yvonne Coutant was one of these. She had no scruples when she opened her house, as to who came into it. She demanded only beauty, eternal youth, and a willingness to be an appropriate picture for the shining, golden frame she provided.

"One simply cannot afford not to be in on one of Yvonne's affairs," Mrs. Brownley-Smith, of the Polo crowd, repeatedly said. "One's husband is sure to be there, and so is his favorite of the moment. I always go in order to discover who Tom's loving now. It's the only way I have of checking up on the fluctuations of his taste.

"Yvonne's own latest former husband, Alfred Coutant, the novelist, never missed her entertainments. 'I get at least four chapters from every one of them,' he would explain. 'She's awfully good to let me come—sort of jolly like, you know.'"

So it was that an interesting company moved about among the roses and lilies and daffodils that filled every corner of the spacious house with fragrant baskets of thick, flaming carnations relieving the paleness of the throats of women. And so it was that Joanna stood, arms outstretched that she might realize the line and symmetry of them, before the long mirror in her dressing room, upstairs. The slim body of her's was vibrant with memories of the day and eagerness for the night. In her eyes were all the ecstacies. Strewn around her were the things from the shops—more gorgeous things from more gorgeous shops than she, alone, ever could have discovered. It was from them she had made her choice—or Yvonne had made it for her—and she stood, before the glass, a soft, mellow vision of lace and chiffons fashioned by deft fingers and cunning brains to emphasize that beauty of girlhood that only a sculptor could display more alluringly or frankly. On the dressing table before her were spread the souvenirs of an hour with Yvonne in the great jewelry store; wristlets of diamonds, rubies and sapphires; necklets of platinum chains, as thin as the sheerness of lingerie, with shining gems in their delicate pendants.

From all of these Yvonne had chosen a single ornament, a rope of shimmering pearls that wound once around the slender, perfect neck and arms.

"Miss Twenty-seven of the Silks" had completed her transition and awaited her summons into the magic world below—the magic world where money bought a smile or a kiss bought pearls like hers.

While Joanna stood before her mirror, Andrew Eggleston, sat at the long carved table in the sombre-toned library of his house—which was not of the Avenue, but still on it, stubborn ghost of the days when the Avenue was jealous of its exclusive rank. Joanna's eyes caressed the loveliness her mirror reflected; a loveliness that epitomized, as in a shatter dual, all the pretences of her kind. Her toes tingled with the promise of adventures. Dimples danced their provocation about her mouth. Through the slimy web of chiffons youthful limbs mocked at the unlovliness of the couturier's mask of them; gold brown hair, hugged close to the restless head, delicately arched eyebrows shaped as only a painter could conceive them—lips and arms and bare shoulders made a marvelous ensemble of enticement.

Andrew Eggleston, in the heavy library room, also eyed a vision—also the figure of a girl, and of Joanna's age—but of a long time ago. The girl the banker watched looked down at him, from a canvas, held in its massive frame over the great fireplace. There was no dancing in her eyes, but a wistfulness that seemed to reach out to the man who gazed, like a quavering beam of mellow radiance. The lips were blood red, and full, and shaped for a kiss, but they were not scarlet, nor voluptuous. They were as if there was no such a thing as a lip stick. The hair was brown, shimmering, as Joanna's, but it was not bobbed—but plied in glorious opulence.

The banker, who would have been young when this girl in the gold frame was young, passed his hand across his brow, to break a spell with which the girl in the painting encompassed him. Then his attention fell to bits of paper spread before him like the jewels on Joanna's dressing table. One by one he picked them up and read them—read the cancelled checks which signified the purchases Joanna had made that day, checks that had been hurriedly cashed so the girl might take her purchases away with her. They totalled thousands, many thousands. At the jewelry store alone Joanna had spent more than a tenth of her million dollars. It was all totalled in the cancelled checks.

"The play begins! It is to be a comedy, after all!"

It was said quietly, evenly, but there was just a nuance in the tone that might have been repressed exultation. The speaker stood behind the banker, a figure in faultless evening clothes, silk hatted, white gloved. About his lips played the wraith of a smile—a cynical smile. In his eyes there was amusement. Just at that moment an ancient butler appeared at the library door and spoke:

"Your car has arrived, Mr. Brandon."

Eggleston started. "You will be seeing her, tonight, then?" he asked calmly.

"Yes. She will be plunged into the abyss tonight, by her new friend, Yvonne Coutant. She will swim like a sinuous mermaid through the sordid scenes of half a score of old men whose lips she'll moisten with the sight of her, and half a hundred young men who will make wagers as to which will be first to break her. The end is in sight tonight."

Eggleston did not reply for a moment. He raised his glance again to the girl n the painting. Then he said, heavily:

"Still, I'd like to see her—here, in this room. Arrange, some way, to bring her tomorrow."

Brandon bowed slightly, and went out of the room and to his car which waited at the curb. He gave his order briefly: "To Miss Coutant's."

Meanwhile Joanna, before her mirror, waited to be summoned to the old men and the young men, and their young women and old, downstairs.

Yvonne appeared in the doorway. The younger girl gave a little gasp when she saw her. In contrast to the soft white tones of Joanna's gown, Yvonne's was a shining black velvet that clung to the curve of her figure like a sheath, giving her vulcanite and uncovered back shone boldly and half its complement. Her shoulders glistening white.

"You will be something of a sensation, tonight, my dear!" the older woman exclaimed, when Joanna had walked across the room, and had whirled and stood still for her inspection. Joanna was much too happy to reply.

Yvonne's appearance among her guests was the signal for dancing to begin—also for the breaking down of all barriers built by formalities. Women who had gathered in stiff little groups to discuss other women or the escapades of other women were swept away to the first dance and their first drink and the first round of their preferred flirtations. The big drawing room had been made into a dancing room. In the winter garden the only light were fire flickering lanterns hidden among the foliage. Great palms made screens across corners of the drawing and sitting rooms, and in the hallways. "Yvonne," said Mrs. Brownley-Smith, "knows that two people never have to fumble for conversation when they're hidden behind palms."

(To be continued)

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy for Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the love that is shown is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mother's have found such a remedy in Baby's Own Tablets and many of them use no other medicine for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can 'strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Bockville, Ont.

Two Kinds Of Motorists

Well Meaning Driver Should Get Different Treatment From Hardened Lawbreaker

There is so much difference between the nervous and well meaning driver who through ignorance or forgetfulness breaks a minor rule and the hardened lawbreaker who "slips one over" on the cops when he is sure they aren't looking, that at times it seems that there should be entirely distinct organizations for dealing with the two. One is not a lawbreaker and should not be regarded as one nor herded with criminals. The other deliberately scoffs at reasonable restraint on his criminal instincts, with human lives at stake. It is not hard to distinguish the two classes. Warnings, tempered with politeness and patience, could with profit be given to the one class; jail sentences are none too severe for the other.—Flint Daily Journal

Mothers Treat Colds The New "Direct" Way

No Longer Necessary to "Dose" Children With Internal Medicines to Break Colds.

Children's digestions are easily upset by too much "dosing." Vicks VapoRub being externally applied, does not upset little stomachs.

At the first sign of croup, sore throat, or any other cold trouble, apply Vicks freely. There is nothing to swallow—you just "rub it on."

VICKS VAPORUB

Peasant's Son Made Ruler

Chosen Fifty Years Ago as Gaekwar of Baroda

The Gackwar of Baroda has achieved a record. He has sat upon his throne for fifty years, an unusual term among Indian rulers in recent centuries. The state over which the oddly titled ruler has presided for half a century is described in a bulletin from the Washington, D.C., headquarters of the National Geographic Society.

"Baroda, one of the wealthiest of the Indian native states, is a group of 'islands' on dry land," says the bulletin.

"The territories, which total 8,000 square miles, begin near the west coast of India, 150 miles north of Bombay City, and extends for 200 miles to the north. Other fragments are scattered off to the west coast on the Kathiawar Peninsula, the most remote being 225 miles from Baroda City, the capital.

"The life of the present Gaekwar has been like that of the hero of a fairy tale. In 1875 the ruler of Baroda was accused of attempting to poison the British resident, and was deposed. He had no heir, so a search was made by the British Government for a collateral relative. A young lad, the son of a humble herdsman, was chosen and was placed on the throne in 1876. It is he who is the present Gaekwar.

Little Helps For This Week

A merry heart maketh a cheerful countenance.—Prov. xv. 13.

Why not take life with cheerful trust
With faith in the strength of weakness?
The gladdest daisy rears its head
With courage and with meekness.
A sunny face
Hath holy grace
To woo the sun forever.
—Mary Mapes Dodge.

It is part of my religion to look well after the cheerfulnesses of life, and let the dismals shift for themselves, believing with good Sir Thomas More that it is wise to be "Merrie in God."—Louisa May Alcott.

I do not know any way so sure of making others happy as of being so one's self.—Sir Arthur Helps.

Did Not Sound Good

Criticism of Japanese Explained When Investigated by Famous Tenor

John McCormack, famous Irish tenor, likes to read criticisms of his singing, but when a Japanese critic said the singer "suffocated" his audience, that was too much. Discussing the incident, McCormack said he read a review, translated from the Japanese into English, in which it gave the startling information that "Mr. McCormack suffocated his audience." "It seemed a case for investigation," the singer declared. The critic meant, McCormack learned, that the singer "left the audience breathless."

"How nice it would be if nobody ever made a mistake."

"I don't know about that, I manufacture erasers."

Canadian Pacific Exhibits

Canada Being Advertised Throughout The World Through Agency of C.P.R.

One of the most potent ways in which the Canadian Pacific Railway is advertising Canada both to the Dominion itself and to the rest of the world is through the work of the Exhibits Branch of the Company, and some idea of the latitude and comprehensiveness of the efforts of this branch may be gathered from the fact that at the time this is written seven expositions are being staged simultaneously under its direction—at the Canadian National Exhibition at Toronto; at the Sesqui-centennial Exhibition at Philadelphia; and at fairs at Quebec, Sherbrooke, London, Ontario, Fredericton and Saint John, New Brunswick. And this is but a phase of the unceasing work which is being performed by the Company in keeping Canada and the Canadian Pacific Railway before the eyes of the world.

For years the Canadian Pacific Railway has participated with an outstanding display at the Canadian National Exhibition at Toronto, and the exhibit, annually improved, is declared to be finer than ever this year. Months of study on the part of directors, weeks of labor on the part of painters, engineers and mechanics, have contributed to the fine artistic presentation, startling for its clever illusions and unique lighting effects. The whole presents a very complete survey of Canada. Its scenic attractions, agricultural and industrial resources and commercial life. A model train, electrically operated and illuminated, specially brought from the British Empire Exhibition at Wembley, where for two years it was a centre of attraction, runs in front of a frieze which takes the visitor through a cross section of Canada from Quebec to Vancouver. Such accurate attention has been paid to detail that central facilities as Quebec, Montreal, Toronto, the Twin Cities, Winnipeg, Banff, Vancouver and other cities are easily recognized.

Lending regard to the increasing national character of the Canadian National Exhibition, and the manner in which it is attracting exhibitors and visitors from all parts of the globe, this is to be considered a national work of world-wide advertisement. In line with the policy adopted by the company in 1911 when inaugurating exhibits, of neglecting no opportunity of bringing Canada forcibly and appealingly to the attention of the world. It is in a way comparable to the work the company performs periodically by representation through elaborate and expensive exhibits at the world's largest expositions.

Some of these have been the New York Land Show in 1911 and 1912; the Chicago Land Show in 1913; the San Francisco Exhibition in 1914 and 1915; the Ideal de Lyons in 1918; the New York Chemical Exhibition; and the Tokio Peace Exposition. For two years the company was represented through a handsome pavilion at the British Empire Exhibition at Wembley. Following this, space was taken at the New Zealand and South Seas Exhibition for an elaborate picturization of the Dominion. At the present time "Treasure Island," brought from Wembley, is an outstanding attraction at the Sesqui-centennial Exhibition at Philadelphia. Almost without interruption Canada is being advertised in some part of the world through the Company's participation in a world exposition.

The Exhibits Branch makes it a point to every year install exhibits at all the larger fairs throughout the Dominion, provincial, municipal, and local, with the idea of the attention of the people of one section of the country the beauty and resources of other sections. In addition it maintains thirty-five permanent exhibits in great centres of population in the United States and Canada, as well as others in the British Isles, with reproductions of Canadian scenery and samples of Dominion products which are potent advertisements of the country's opportunity to the people of the Republic and the tourist to Canada.

The Exhibits Branch has rapidly developed to be a very important phase of the operation of the railway, of tremendous value to the Dominion at large, with benefits that are many and widespread though frequently they are difficult to trace. Appropriations for this branch of work are now considerable; the men engaged in its operations are highly specialized; great artistic, mechanical, and organizing ability are called into play. All this that Canada may be adequately represented wherever large crowds of people are brought together, and its opportunity kept ceaselessly before the world.

Accused (just acquitted, to counsel): Thanks awfully, old man. What on earth should I have done without you?

Counsel: Oh, about five years.—

Minard's Liniment for chapped hands.

WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and would not be without it now. I had a female trouble so badly I could hardly walk and I was all run-down and could hardly get around to do my housework. I would be in bed three or four days at a time. I was told by a friend to try your Vegetable Compound. I did, and by the time I took two bottles I was beginning to get around again. I took ten bottles in all, and now I am all right again and doing my own work. I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Sanative Wash, and I think it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be better off. I would not be without it if it cost much more."—Mrs. NELLIE HORN, 28 St. Matthews Avenue, Hamilton, Ontario.

Do you feel broken down, nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently, will relieve this condition. C

Dressing Children no Problem Now!

It doesn't cost much to keep the youngsters dressed in all the pretty colors of the season! Buy less, use less—and Diamond dye their dresses, waists, blouses, etc.

Home dyeing is easy. It's lots of fun. The results are perfect, when you use *real* dye. Right over other colors, any kind of material, in an hour's time! Keep your own clothes in style, too, by making them the newest shades. Also, the drapes and hangings in your home.

After Every Meal

Has Faith In Alberta

Editor of Cosmopolitan Magazine Buys Ranch Near High River

An interesting addition to Alberta's farming population is Frazier Hunt, associate editor of the Cosmopolitan Magazine. Mr. Hunt has been making frequent trips to Alberta in recent years, especially at the time of the Calgary stampede, and has become an enthusiastic exponent of this province. In order to show his faith in Alberta in some concrete way he has purchased a ranch in the neighborhood of the Prince of Wale's ranch near High River. It is Mr. Hunt's intention to spend some time each year on his Alberta ranch.

The Man With Asthma.—Almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellog's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Customer: Two eggs poached medium soft, buttered toast, not too hard, coffee without too much cream in it.

Waiter: Yes, sir. Would you like any special design on the dishes?—Weekly Scotsman, Edinburgh.

Back pay is usually slow about coming to the front.

FACE WOULD SMART TERRIBLY

Hard, Red Pimples Broke Out. Cuticura Heals.

"My trouble was caused by eating apples. My face began to break out with pimples that were hard and red at first and then festered and scaled over. They spread all over my face making it very sore. After the scales came off my face would burn and smart terribly.

"I used everything I could think of without any benefit. A friend recommended Cuticura Soap and Ointment so I purchased some, and in four weeks I was healed, after using two cakes of Soap and one box of Ointment." (Signed) Mrs. Edith Brown, 37 Fortney Pl., Barre, Vt., Sept 26, 1925.

Rely on Cuticura Soap, Ointment and Talcum to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Cuticura, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

In Lighter Vein

The Blighter—"They put me hin the barracks; they took me blinkin' clothes and put me in khaki; they took away me name an' made me 'No 575'; they took me to church, where I'd never been before, and they made me listen to a sermon for forty minutes. Then the parson said 'No. 575, Art thou weary, art thou languid?' and I got seven days in the guardhouse because I answered that I certainly was."

Storing of Dahlias and Gladioli

(Experimental Farm Notes)

Dahlias should be taken up soon after the tops have been killed back by frost and before the frost gets down as far as the tubers. The method adopted at the Scott Experimental Station is to place the tubers in a box at the time of digging and cover the tubers with sand or soil. The dahlias are stored in the potato cellar and thus kept dormant during the winter months. In the early spring a liberal supply of water will start the tubers growing. They are given sufficient light to make sturdy plants for planting in the flower beds after danger of frost is over.

Gladioli should be taken up before the ground freezes down to the corm. They are as well left in the ground as long as possible so that the corms will have the longest time for development. At the Scott farm, the gladioli corms or bulbs are stored in the same manner as dahlia tubers.

Any time after the first of May they are transplanted to the flower borders.

THE OYEN NEWS

Here and There

More than 300,000 people will have visited Ste. Anne de Beaupre this year when the season ends. It is already an increase over last year when 304,322 persons visited this famous shrine. During the week ending August 22nd, 43,900 pilgrims visited Ste. Annes.

Halifax.—Considerable quantities of swordfish are being shipped from Nova Scotia to the Boston market at the present time. This commodity has found a good market in Boston and shipments to that city average around ten to fifteen thousand pounds a day during the shipping season.

September is becoming a popular month for marriages judging by the number of honeymoon couples leaving from Windsor Street Station, Montreal, recently. On Labor Day no less than 50 couples boarded the Canadian Pacific trains at this depot. The record established for one day, however, was some years ago in June when 70 couples left Windsor Station one morning.

The new North Channel below Quebec will be opened to navigation on June 1 next and continue during the high water season, according to a recent announcement of the Marine Department. The new channel extends in a straight line from St. Jean, Isle of Orleans, to near the north shore. The work has been underway for the past ten years. The minimum depth of water at high tide will be 35 feet. When all the work is completed there will be the same depth at low tide.

IN almost every line of business the Chevrolet Utility Express truck has established a new record of economy in operation and maintenance.

Truck owners are amazed at the low upkeep costs of this Chevrolet one-ton truck and the day-in, day-out service under which it stands up so dependably.

The smooth Chevrolet engine provides abundant power—even for considerable overloads—on hills and rough roads.

A close inspection of the utility express chassis and the records of Chevrolet truck owners will explain to you the performance and economy that have made Chevrolet the world's third largest producer of trucks and commercial cars.

Ask your Chevrolet dealer for description and prices of the type of body most suitable for your business. Any regular body style may be built on the Chevrolet utility express chassis.

The Smoothest Chevrolet in Chevrolet history is selling at the Lowest Price for which Chevrolet has ever been sold in Canada.

Ask about GMAC Plan of Deferred Payments.
